AS/NZS 4056.1:1992

This Standard was prepared under a joint arrangement by Standards Australia and the Standards Association of New Zealand. It was approved for publication on behalf of the Council of Standards Australia on 16 July 1992 and on behalf of the Standards Council of New Zealand on 11 September 1992. It was published on 14 September 1992.

The following organizations are represented on the Committees responsible for this Standard:

Standards Australia Committee ME/10, Small Tools

Austroroads
 Confederation of Australian Industry
 CSIRO, Division of Manufacturing Technology
 Deakin University
 Department of Defence
 Fasteners Institute of Australia
 Metal Trades Industry Association of Australia
 N.S.W. TAFE Commission
 Railways of Australia Committee
 Society of Automotive Engineers, Australia
 Telecom Australia
 WorkCover Authority, New South Wales

Standards Association of New Zealand Committee 50/-, Mechanical and General Board

Accident Compensation Corporation
 Consumers Institute
 Department of Labour
 Department of Scientific & Industrial Research
 Institution of Professional Engineers of New Zealand
 Medical Association
 Ministry of Commerce
 Ministry of Transport
 National Council of Women
 New Zealand Chemical Industry Council
 New Zealand Manufacturers Federation

Review of Standards

To keep abreast of progress in industry, Australian and New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all publications of the Standards Association of New Zealand and Standards Australia will be found in the Catalogue of Publications of the respective organization; this information is supplemented in their monthly magazines, which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian and New Zealand Standards, addressed to the head office of the relevant organizations are welcomed. Notification of any inaccuracy or ambiguity found in either an Australian or New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the joint Standards Australia/Standards Association of New Zealand Committee on Small Tools. It is identical with and has been reproduced from ISO 5742:1982, *Pliers and nippers—Nomenclature* and includes Addendum 1:1985.

Under arrangements made between Standards Australia, the Standards Association of New Zealand and the international Standards bodies, ISO and IEC, as well as certain other Standards organizations, users of this joint Australian/New Zealand Standard are advised of the following:

- (a) Copyright is vested in Standards Australia, and the Standards Association of New Zealand.
- (b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.
- (c) Where any cross-references to page numbers appear within the text, these relate to page numbering in the International Standard and are to be disregarded.

This Standard is one of a series which deal with pliers and nippers for general use, the series being arranged as follows:

AS/NZS 4056.1	Part 1:	Nomenclature
AS/NZS 4056.2	Part 2:	General technical requirements
AS/NZS 4056.3	Part 3:	Methods of test
AS/NZS 4056.4	Part 4:	Pliers for gripping and manipulating—Dimensions and test values
AS/NZS 4056.5	Part 5:	Engineer's and lineman's pliers—Dimensions and test values
AS/NZS 4056.6	Part 6:	Lever assisted side cutting pliers, end and diagonal cutting nippers—Dimensions and test values
AS/NZS 4056.7	Part 7:	End cutting nippers—Dimensions and test values
AS/NZS 4056.8	Part 8:	Diagonal cutting nippers—Dimensions and test values
AS/NZS 4056.9	Part 9:	Multiple slip joint pliers—Dimensions and test values
AS/NZS 4056.10	Part 10:	Construction worker's pincers—Dimensions and test values
AS/NZS 4056.11	Part 11:	Carpenter's pincers—Dimensions and test values

The New Zealand copyright of this document is the property of the Standards Council. No part of it may be reproduced by photocopying or by any other means without prior written permission of the Director of the Standards Association of New Zealand unless the circumstances are covered by the exemption sections (19 and 21) of the Copyright Act 1962.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

Pliers and nippers

Part 1: Nomenclature

Scope and field of application

This International Standard gives a nomenclature of pliers and nippers in English, French and Russian.

The figures in this International Standard are only examples, and are not intended to affect the manufacturer's design.

NOTE — In addition to terms used in the three official ISO languages (English, French and Russian), this International Standard gives the equivalent terms in the German, Italian and Spanish languages (see annex); these have been included at the request of technical committee ISO/TC 29, and are published under the responsibility of the member bodies for Germany, F.R. (DIN), Italy (UNI) and Spain (IRANOR) respectively. However, only the terms given in the official languages can be considered as ISO terms.

Objet et domaine d'application

La présente Norme internationale donne une nomenclature des pinces et tenailles, en anglais, français et russe.

Les figures illustrant la présente Norme internationale ne sont données qu'à titre d'exemples. Elles ne doivent en rien influencer la conception.

NOTE — En supplément aux termes donnés dans les trois langues officielles de l'ISO (anglais, français et russe), la présente Norme internationale donne, en annexe, les termes équivalents en allemand, italien et espagnol; ces termes ont été inclus à la demande du comité technique ISO/TC 29, et sont publiés sous la responsabilité des comités membres de l'Allemagne, R.F. (DIN), de l'Italie (UNI) et de l'Espagne (IRANOR), respectivement. Toutefois, seuls les termes donnés dans les langues officielles peuvent être considérés comme termes ISO.

Объект и область применения

Настоящий Международный Стандарт дает номенклатуру плоскогубцев и кусачек на английском, французском и русском языках.

Рисунки, иллюстрирующие настоящий Международный Стандарт, даются только в качестве примера. Они не должны ни в коем случае оказывать влияние на конструкцию.

ПРИМЕЧАНИЕ — В дополнение к терминам на трех официальных языках ИСО (английском, французском и русском), настоящий Международный Стандарт приводит эквивалентные термины на немецком, итальянском и испанском языках. Эти термины публикуются под ответственность комитетов-членов Федеративной Республики Германии (ДИН), Италии (УНИ) и Испании (ИРАНОР). Тем не менее, только термины на официальных языках могут рассматриваться как термины ИСО.

1 Cutting nippers

Pinces coupantes

Кусачки

No. N°	Designation Dénomination Наименование	Figure Рисунок
101	Diagonal cutting nipper	
	Pince coupante diagonale	
	Кусачки боковые	
102	End cutting nipper	
	Pince coupante en bout	
	Кусачки торцовые	
103	Toggle lever assisted end cutting nipper	
	Pince coupante en bout à articulation démultipliée	
	Кусачки рычажные	
104	Lever assisted end cutting nipper	
	Pince articulée coupante en bout	
	Кусачки рычажные	

2 Gripping pliers

Pinces de serrage

Плоскогубцы

No. N°	Designation Dénomination Наименование	Figure Рисунок
201	Flat nose plier	
	Pince plate	
	Плоскогубцы	
202	Snipe nose plier (Needle nose plier)	
	Pince demi-ronde	
	Плоскогубцы с удлиненными губками	
203	Round nose plier	
	Pince ronde	
	Круглогубцы	

3 Combined gripping and cutting pliers
Pinces coupantes et de serrage
Плоскогубцы комбинированные

No. N°	Designation Dénomination Наименование	Figure Рисунок
301	Snipe nose plier with side cutter (Needle nose plier with side cutter)	
	Pince demi-ronde à coupe de côté	
	Плоскогубцы с удлиненными губками с режущими кромками	
302	Lever assisted parallel action flat nose plier with side cutter	
	Pince coupante articulée	
	Плоскогубцы рычажные с режущими кромками	
303	Engineer's plier (Combination plier)	
	Pince universelle	
	Плоскогубцы комбинированные	
304	Lineman's plier	
	Pince «lineman's»	
	Плоскогубцы
