AS/NZS 4255.2:1994

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME/69, Security Seals. It was approved on behalf of the Council of Standards Australia on 9 September 1994 and on behalf of the Council of Standards New Zealand on 19 September 1994. It was published on 14 November 1994.

The following interests are represented on Committee ME/69:

Association of Employers of Waterside Labour
Australia Post
Australian Chamber of Shipping
Australian Customs Service
Australian National Maritime Association
Chartered Institute of Transport in Australia
International Cargo Handling Co-ordination Association
Master Locksmiths Association of Australasia
New Zealand Security Industry Association
Railways of Australia Committee

Additional interests participating in preparation of Standard:

Australian Security Intelligence Organisation
N.S.W. Police Service

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME/69 on Security Seals.

This Standard is based on ASTM F 946-85, *Guide for Establishing Security Seal Control and Accountability Procedures*, and ASTM F 1158-88, *Guide for Inspection and Evaluation of Tampering of Security Seals*.

This Standard proposes guidance for the correct use of security seals and is intended as a general guide when establishing control procedures for their effective use. It is not intended to restrict the use of additional procedures that may be required for unique or unusual situations, and some of the specified procedures may not be relevant to a particular situation.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.
