

Australian/New Zealand Standard™

Radiocommunications equipment used in the handphone and citizen band radio services operating at frequencies not exceeding 30 MHz

AS/NZS 4355:2006

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee RC-006, Radiocommunications Equipment—General. It was approved on behalf of the Council of Standards Australia on 8 August 2006 and on behalf of the Council of Standards New Zealand on 18 August 2006.
This Standard was published on 22 September 2006.

The following are represented on Committee RC-006:

Australian Communications and Media Authority
Australian Electrical and Electronic Manufacturing Association
Australian Information Industry Association
Australian Marine Industries Federation
Civil Aviation Safety Authority
Electromagnetic Compatibility Society of Australia
Electromagnetic Technical Evaluation Committee
Ministry of Economic Development, NZ
Singtel Optus

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 06077.

RECONFIRMATION

OF

AS/NZS 4355:2006

**Radiocommunications equipment used in the handphone and citizen band radio
services operating at frequencies not exceeding 30 MHz**

RECONFIRMATION NOTICE

Technical Committee RC-006 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 23 December 2015.

Approved for reconfirmation in New Zealand on behalf of the Standards Council of New Zealand on 18 May 2016.

The following are represented on Technical Committee RC-006:

Association of Accredited Certification Bodies
Australasian Procurement and Construction Council
Australian Information Industry Association
Certification Interests (Australia)
Consumers Federation of Australia
International Accreditation New Zealand
Joint Accreditation System of Australia and New Zealand
National Association of Testing Authorities Australia
New Zealand Organisation for Quality
Therapeutic Goods Administration

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee, RC-006, Radiocommunications Equipment—General to supersede AS/NZS 4355:1995. It was developed from Department of Transport and Communications (Australia) documents, ECR 312, *27 MHz CBRS Equipment* and ECR 316, *27 MHz Handphone Equipment*. It is one of a series of Standards dealing with Radiocommunications equipment, under the terms of a Memorandum of Understanding between Standards Australia and the Australian Communications and Media Authority.

The standard was revised to introduce tolerances to the transmitter power measurement and change equipment identification requirement.

The objective of this Standard is to specify the essential requirements and minimum standards for radiocommunications equipment intended to operate in the handphone and citizen band radio services at frequencies not exceeding 30 MHz.
