

STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Amendment No. 1
to
AS/NZS 4456.10:2003
Masonry units, segmental pavers and flags—Methods of test
Method 10: Determining resistance to salt attack

CORRECTION

The 2003 edition of AS/NZS 4456.10 is amended as follows; the amendment(s) should be inserted in the appropriate place(s).

SUMMARY: This Amendment applies to Clauses 1, 8.3(g), 10.1(b) and the back cover.

Published on 16 August 2004.

Approved for publication in New Zealand on behalf of the Standards Council of New Zealand on 21 May 2004.

Delete (g) and its contents and *Replace* with the following:

(g) Repeat Steps (a) to (f).

Continue the process until the total mass loss for the test specimen is equal to, or greater than, the specified criterion or 40 cycles have been completed, whichever occurs first. The number of particles that makes up the maximum specified mass loss shall exceed 10.

NOTE: Though testing may be stopped after the first specimen failure, it is recommended that testing of the remaining test specimens be continued until the specified criterion has been exceeded.
