Protective clothing— Protection against liquid chemicals

Part 3: Test method: Determination of resistance to penetration by spray (Spray Test)

[EN title: Protective clothing — Protection against liquid chemicals —
Test method: Determination of resistance to penetration by spray
(Spray Test)]

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee SF/4, Occupational Protective Clothing. It was approved on behalf of the Council of Standards Australia on 15 August 1997 and on behalf of the Council of Standards New Zealand on 4 August 1997. It was published on 5 October 1997.

The following interests are represented on Committee SF/4:

Australian Association of Certification Bodies
Australian Business Limited
Australian Chamber of Manufactures
Australian Chamber of Commerce and Industry
Australasian Fire Authorities Council
Australian Wool Processors Council
Australian Wool Research and Promotion Organisation
Australian Wool Testing Authority
Bureau of Steel Manufactures of Australia
Confederation of Australian Motor Sport
Country Fire Authority of Victoria
Department of Defence
National Occupational Health and Safety Commission
Safety Institute of Australia
Textile Clothing and Footwear Union of Australia
Transit New Zealand
United Firefighters Union of Australia
University of Otago, New Zealand
Victorian WorkCover Authority
WorkSafe Western Australia

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 95467.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee SF/4 on Occupational Protective Clothing.

The objective of this is to provide means for assessing the resistance of materials used in the manufacture of protective clothing to penetration by a spray of water.

This Standard is identical with and has been reproduced from the European (CEN) Standard EN 468:1994, *Protective Clothing—Protection against liquid chemicals—Test method: Determination of resistance to penetration by spray (Spray Test)*.

As this Standard is reproduced from a European Standard, the following applies:

- (a) Its number appears on the cover and title page while the European Standard number appears only on the cover.
- (b) In the source text, ‘this European Standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.
