AS/NZS 4524.14:1998

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME/33, Abrasives. It was approved on behalf of the Council of Standards Australia on 30 September 1997 and on behalf of the Council of Standards New Zealand on 29 September 1997. It was published on 5 January 1998.

The following interests are represented on Committee ME/33:

Abrasives Institute of Australia
Australian Association of Certification Bodies
Australian Business
Australian Chamber of Commerce and Industry
Furnishing Industry Association of Australia
Industrial Diamond Association
New Zealand Institute of Engineering Sciences
University of Melbourne

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME/33, Abrasives, to supersede, in part, AS B172.1—1967, *Bonded abrasive products, Part 1: Designation and marking*, and AS B172.2—1968, *Bonded abrasive products, Part 2: Shapes and dimensions of grinding wheels*.

This Standard is technically equivalent to and has been reproduced from ISO/DIS 603-14:1996, *Bonded abrasive products—Dimensions, Part 14: Grinding wheels for deburring and fettling/snagging on an angle grinder*, in the expectation that ISO/DIS 603-14 will be published without further major amendment. This Standard will be reviewed at that time.

Appendix ZZ details the variation to ISO/DIS 603-14 for application in Australia and New Zealand. The term 'normative' has been used to define the application of the appendix. A 'normative' appendix is an integral part of a Standard.

The objective of this Standard is to provide manufacturers and users of bonded abrasive products with details of minimum dimensional requirements which should be incorporated into these products.

This Standard is one of a series of Standards applicable to bonded abrasive products.

Statements expressed in mandatory terms in notes to tables, figures or clauses are deemed to be requirements of this Standard.

As this Standard is reproduced from an international Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text, 'this International Standard' should read 'this Australian/New Zealand Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to international Standards should be replaced by equivalent Australian, New Zealand or Australian/New Zealand Standards, as follows:
