**Page 16, Clause 8.6.1**

*Replace* Clause 8.6.1 with the following text:

‘For portable and mobile transceivers with a maximum transmitter output not exceeding 25 watts PEP, the level of each of the two interfering signals which result in a 20dB SINAD ratio at the receiver output shall not be less than +70dBuV emf. For all other equipment the level of each of the two interfering signals which result in a 20dB SINAD ratio at the receiver output shall not be less than +80dBuV emf.’
