

STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

**Amendment No. 1
to
AS/NZS 60335.2.80:2016
Household and similar electrical appliances – Safety –
Part 2.80: Particular requirements for fans**

REVISED TEXT

The 2016 edition of AS/NZS 60335.2.80 is amended as follows;

SUMMARY: This amendment applies to Foreword and national variations

Published on 26 June 2020

Approved for publication in Australia on behalf of the Council of Standards Australia on 16 June 2020

Approved for publication in New Zealand by the New Zealand Standards Approval Board on 3 June 2020

The national variations in this amendment takes effect two years from the date of publication of this amendment. During this period the Standard AS/NZS 60335.2.80:2016 without this amendment will also remain current. Regulatory authorities that reference this Standard in regulation may apply these requirements at a different time. Users of this Standard should consult with these authorities to confirm their requirements.

AUSTRALIAN NATIONAL VARIATIONS

Add the following variation:

- p **7.12** The instructions for partition fans and duct fans shall include the substance of the following:

Exhaust fans may adversely affect the safe operation of appliances burning gas or other fuels (including those in other rooms) due to back flow of combustion gases. These gases can potentially result in carbon monoxide poisoning. After installation of an exhaust fan such as a partition fan or a duct fan the operation of flued gas appliances should be tested by a competent person to ensure that back flow of combustion gases does not occur.

NEW ZEALAND NATIONAL VARIATIONS

Add the following variation:

- p **7.12** The instructions for partition fans and duct fans shall include the substance of the following:

Exhaust fans may adversely affect the safe operation of appliances burning gas or other fuels (including those in other rooms) due to back flow of combustion gases. These gases can potentially result in carbon monoxide poisoning. After installation of an exhaust fan such as a partition fan or a duct fan the operation of open flued gas appliances should be tested by a competent person to ensure that back flow of combustion gases does not occur.
