Safety requirements
(IEC 60968:1988, MOD)**

Standards Australia

Document Sharing Hub

AS/NZS 60968:2001

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-041, Lamps and related equipment. It was approved on behalf of the Council of Standards Australia on 2 October 2001 and on behalf of the Council of Standards New Zealand on 12 October 2001. It was published on 29 November 2001.

The following interests are represented on Committee EL-041:

Association of Consulting Engineers, Australia
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Consumer Federation of Australia
Electrical Compliance Testing Association of Australia
Electrical Regulatory Authorities Council
Energy Efficiency and Conservation Authority of New Zealand
Illuminating Engineering Society of Australia and New Zealand
International Accreditation New Zealand (IANZ)
Ministry of Economic Development, New Zealand

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 01055.

RECONFIRMATION

OF

AS/NZS 60968:2001

**Self ballasted lamps for general lighting services—Safety requirements
(IEC 60968:1988-MOD)**

RECONFIRMATION NOTICE

Technical Committee EL-041 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 22 July 2013.

Approved for reconfirmation in New Zealand on behalf of the Standards Council of New Zealand on 29 May 2013.

The following are represented on Technical Committee EL-041:

Australasian Fire and Emergency Service Authorities Council
Australian Industry Group
Certification Interests, New Zealand
Consumers Federation of Australia
Department of Climate Change and Energy Efficiency
Electrical Compliance Testing Association
Electrical Regulatory Authorities Council
Energy Efficiency and Conservation Authority of New Zealand
Fair Trading NSW
IES: The Lighting Society
Institution of Professional Engineers New Zealand
International Accreditation New Zealand
Lighting Council Australia
Lighting Council New Zealand
New Zealand Ministry of Business, Innovation and Employment
New Zealand Lighting Manufacturers and Suppliers

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-041, Lamps and related equipment.

The objective of this Standard is to provide the lighting industry with safety requirements on self ballasted lamps for general lighting services.

This Standard is an adoption with national modifications and has been reproduced from IEC 60968:1988, *Self ballasted lamps for general lighting services—Safety requirements* including Amendment 1 (1991) and Amendment 2 (1999).

A vertical line in the margin shows where the base publication has been modified by Amendments 1 and 2.

Variations to IEC 60968:1988 are indicated at the appropriate places throughout this Standard. Strikethrough (~~example~~) identifies IEC tables, figures and passages of text which, for the purposes of this Australian/New Zealand Standard, are deleted. Where Australian/New Zealand tables, figures or passages of text are added, each is set in its proper place and identified by shading (**example**). Added figures are not themselves shaded, but are identified by a shaded border.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

CONTENTS

	<i>Page</i>
1 General	1
1.1 Scope	1
1.2 Normative references	1
2 Definitions	2
2.1 Self-ballasted lamp	2
2.2 Type.....	2
2.3 Rated voltage	2
2.4 Rated wattage	2
2.5 Rated frequency	2
2.6 Cap temperature rise (Δt_s)	2
2.7 Live part.....	2
2.8 Type test.....	2
2.9 Type test sample.....	2
3 General requirement and general test requirements	2
4 Marking	3
5 Interchangeability	4
6 Protection against electric shock	5
7 Insulation resistance and electric strength after humidity treatment	6
7.1 Insulation resistance	6
7.2 Electric strength	6
8 Mechanical strength	6
9 Cap temperature rise.....	7
10 Resistance to heat	7
11 Resistance to flame and ignition.....	8
12 Fault conditions	9
Figure 1 – Standard test finger	10
Figure 2 – Holder for torsion test on lamps with screw caps.....	11
Figure 3 – Holder for torque test on lamps with bayonet caps	12
Figure 4 – Ball-pressure apparatus	13
