

AS/NZS 61386.22:2022

Australian/New Zealand Standard™

Conduit systems for cable management

Part 22: Particular requirements — Pliable conduit systems (IEC 61386-22:2002 (ED 1.0) NEQ)

AS/NZS 61386.22:2022

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee EL-004, Electrical Accessories. It was approved on behalf of the Council of Standards Australia on 4 March 2022 and by the New Zealand Standards Approval Board on 6 April 2022.

This Standard was published on 29 April 2022.

The following are represented on Committee EL-004:

- Australian Chamber of Commerce and Industry
- Australian Industry Group
- Better Regulation Division (Fair Trading, Safework NSW, TestSafe)
- Consumer Electronics Suppliers Association
- Consumers Federation of Australia
- Electrical Regulatory Authorities Council
- Engineers Australia
- International Accreditation New Zealand
- Joint Accreditation System of Australia & New Zealand
- National Electrical Communications Association
- Plastics Industry Pipe Association of Australia
- Plastics New Zealand
- The Manufacturers' Network
- WorkSafe New Zealand

This Standard was issued in draft form for comment as DR AS/NZS 61386.22:2021.

Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-004, Electrical Accessories, to supersede AS/NZS 61386.22:2015 on the date of publication.

The objective of this Standard is to provide Australian and New Zealand electrical industries with requirements for pliable conduit systems for cable management.

The essential safety requirements in AS/NZS 3820, *Essential safety requirements for electrical equipment*, that could be applicable to cable management systems are covered by this Standard.

This Standard is based on but not equivalent to IEC 61386-22, Ed.1.0 (2002), *Conduit systems for cable management, Part 22: Particular requirements—Pliable conduit systems*. The main areas of variation from IEC include dimensional requirements.

This Standard is Part 22 of the AS/NZS 61386 series of Standards on conduit systems. Refer to the online catalogue for a complete list of Standards in the series.

The changes to this Standard introduce additional technical requirements for pliable conduit systems sizes 80, 100, 125 and 150 mm.

The terms 'normative' and 'informative' are used in Standards to define the application of the appendices or annexes to which they apply. A 'normative' appendix or annex is an integral part of a Standard, whereas an 'informative' appendix or annex is only for information and guidance.

Contents

Preface	ii
1 Scope and application	1
2 Normative references	1
3 Definitions	1
4 General requirements	1
5 General conditions for tests	1
6 Classification	1
7 Marking and documentation	1
7.1 Information to be marked on conduits	2
8 Dimensions	2
9 Construction	3
10 Mechanical properties	3
11 Electrical properties	4
12 Thermal properties	4
13 Fire effects	5
14 External influences	5
15 Electromagnetic compatibility	5
Appendix A (normative) Determination of material thickness	8
Appendix B (normative) Measurement of the dimensions of conduits and fittings	9
