IEC 62386-150:2023

Australian/New Zealand Standard™

Digital addressable lighting interface

Part 150: Particular requirements — Auxiliary power supply

AS/NZS IEC 62386.150:2024

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee EL-041, Lighting. It was approved on behalf of Standards Australia's Standards Development and Accreditation Committee on 25 January 2024 and by the New Zealand Standards Approval Board on 01 November 2023.

This Standard was published on 23 February 2024.

The following are represented on Committee EL-041:

- Australian Industry Group
- Better Regulation Division (Fair Trading, SafeWork NSW, TestSafe)
- Consumer Electronics Suppliers Association
- Consumers Federation of Australia
- Department of Climate Change, Energy, the Environment and Water
- Electrical Compliance Testing Association of Australia
- Electrical Regulatory Authorities Council, Australia
- Energy Efficiency & Conservation Authority of New Zealand
- Energy Efficiency Council
- IES: The Lighting Society
- Joint Accreditation System of Australia & New Zealand
- Joint Accreditation System of Australia and New Zealand — New Zealand
- Lighting Council Australia
- Lighting Council New Zealand
- Master Electricians NZ
- National Association of Testing Authorities Australia

This Standard was issued in draft form for comment as DR AS/NZS IEC 62386.150:2024.

Preface

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee EL-041, Lighting.

The objective of this document is to specify the minimum requirements for an auxiliary (AUX) power supply that can be used to power a load, such as a sensor or communication device.

This document is identical with, and has been reproduced from, IEC 62386-150:2023, *Digital addressable lighting interface — Part 150: Particular requirements — Auxiliary power supply*.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text “this part of IEC 62386” should read “this Australian/New Zealand document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface ii

FOREWORD iv

INTRODUCTION vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 AUX power supply 1

 4.1 General 1

 4.2 Marking of the interface 2

 4.3 Electrical specification of AUX power supply 2

 4.4 Safety rating 3

 4.5 Output overload and short circuit protection 3

Bibliography 4
