ISO 15924:2022

Australian/New Zealand Standard™

Information and documentation — Codes for the representation of names of scripts

AS/NZS ISO 15924:2022

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee IT-019, Information and Documentation, Information Technology — Learning, Education, Training and Research. It was approved on behalf of the Council of Standards Australia on 23 May 2022 and by the New Zealand Standards Approval Board on 1 June 2022.

This Standard was published on 17 June 2022.

The following are represented on Committee IT-019:

Australian Computer Society
Australian Library and Information Association
Australian Research Data Commons
Caval
Charles Darwin University
Council of Australian University Librarians
CSIRO
Education Services Australia
Flinders University
Library & Archives NT
Lincoln University
Macquarie University
NSW Department of Education
National Library of New Zealand
Professional Scientists Australia
University of Otago

This Standard was issued in draft form for comment as DR AS/NZS ISO 15924:2022.

Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-019, Information and Documentation, Information Technology — Learning, Education, Training and Research.

The objective of this document is to specify requirements for the presentation of names of scripts. The codes were devised for use in terminology, lexicography, bibliography, and linguistics, but they can be used for any application requiring the expression of scripts in coded form.

This document also includes guidance on the use of script codes in some of these applications.

This document is identical with, and has been reproduced from, ISO 15924:2022, *Information and documentation — Codes for the representation of names of scripts*.

As this document has been reproduced from an International document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Script codes	2
4.1 Structure of the alphabetic script codes	2
4.2 Structure of the numeric script codes	2
4.3 Relation of the script codes to other ISO standards	3
4.4 Adaptation of the script codes	3
4.5 Addition of new script codes	3
4.6 Application of script codes	4
4.7 Changes of script codes	4
Annex A (normative) Procedures for the Registration Authority and the Registration Authority's joint advisory committee	5
Bibliography	8

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 46, *Information and documentation*.

This second edition cancels and replaces the first edition (ISO 15924:2004), which has been technically revised.

The main changes compared to the previous edition are as follows:

- the normative references clause has been updated;
- references to the holder of the Registration Authority in the text have been removed, examples and references throughout the document have been updated.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
