ISO 20378:2017

Australian/New Zealand Standard™

Welding consumables — Rods for gas welding of non-alloy and creep-resisting steels — Classification

AS/NZS ISO 20378:2023

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee WD-002, Welding Consumables. It was approved on behalf of the Council of Standards Australia on 19 September 2023 and by the New Zealand Standards Approval Board on 06 September 2023.

This Standard was published on 20 October 2023.

The following are represented on Committee WD-002:

- Australian Chamber of Commerce and Industry
- Bureau of Steel Manufacturers of Australia
- New Zealand Heavy Engineering Research Association
- Rail Industry Safety and Standards Board
- University of Auckland (New Zealand)
- Weld Australia

This Standard was issued in draft form for comment as DR AS/NZS ISO 20378:2023.

Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WD-002, Welding Consumables, to supersede AS/NZS 1167.2:1999, *Welding and brazing — Filler metals, Part 2: Filler metal for welding*.

The objective of this document is to specify a classification for the designation of rods for gas welding of non-alloy and creep-resisting steels in terms of the chemical composition of the rod.

This document is identical with, and has been reproduced from, ISO 20378:2017, *Welding consumables — Rods for gas welding of non-alloy and creep-resisting steels — Classification*.

As this document has been reproduced from an International document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
Section 1 Scope	1
Section 2 Normative references	1
Section 3 Terms and definitions	1
Section 4 Classification	1
Section 5 Symbols and requirements	1
5.1 Symbol for the product/process	1
5.2 Symbol for the chemical composition of rods	1
Section 6 Chemical analysis	3
Section 7 Rounding procedure	3
Section 8 Retesting	3
Section 9 Technical delivery conditions	3
Section 10 Designation	3
Annex A (informative) Welding behaviour	4
Bibliography	5
