

Australian/New Zealand Standard™

**Information technology—Learning,  
education and training—Metadata for  
learning resources**

**Part 2: Dublin Core elements**

## **AS/NZS ISO/IEC 19788.2:2013**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-019, Information and Documentation, Information Technology—Learning, Education, Training and Research. It was approved on behalf of the Council of Standards Australia on 19 April 2013 and on behalf of the Council of Standards New Zealand on 8 April 2013.

This Standard was published on 13 May 2013.

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-019, Information and Documentation, Information Technology—Learning, Education, Training and Research.

The objective of this Standard is to specify metadata elements and their attributes for the description of learning resources. It provides a base-level data element set for the description of learning resources, from the ISO 15836:2009 Dublin Core metadata element set, using the framework provided in AS/NZS ISO/IEC 19788.1:2013.

This Standard is identical with, and has been reproduced from ISO/IEC 19788-2:2011, *Information technology—Learning, education and training—Metadata for learning resources*, Part 2: Dublin Core elements.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this part of ISO/IEC 19788’ should read ‘this Australian/New Zealand Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

| <i>Reference to International Standard</i> |                                                                                                 | <i>Australian/New Zealand Standard</i> |                                                                                                 |

## INTRODUCTION

The primary purpose of ISO/IEC 19788 is to facilitate:

- a) the description of a learning resource by providing a standards-based approach to the identification and specification of the metadata elements required to describe a learning resource, e.g. as a metadata learning resource (MLR) record; and
- b) the search, discovery, acquisition, evaluation, and use of learning resources, for instance by learners, instructors or automated software processes.

ISO/IEC 19788 is modularly structured with all subsequent parts corresponding to a specified set of user requirements for the identification and specification of metadata elements having a particular focus and intended use in the description of a learning resource. This includes categories of metadata elements focused on technical perspectives, pedagogical aspects, availability and intellectual property aspects, bindings, etc.

This part of ISO/IEC 19788 uses the data element specification model and framework provided in ISO/IEC 19788-1 to set Dublin Core ISO 15836:2009 elements and associated remarks into the framework of ISO/IEC 19788 so that they can later be used with other data elements from type 1 parts of ISO/IEC 19788, addressing specific user communities' needs for extensions, modularization or refinement.

ISO/IEC 19788-3 provides a recommended approach to further enhance interoperability through an application profile based on the data element specifications from this part of ISO/IEC 19788 as is, or with added constraints.

## AUSTRALIAN/NEW ZEALAND STANDARD

**Information technology—Learning, education and training—  
Metadata for learning resources****Part 2:  
Dublin Core elements****1 Scope**

ISO/IEC 19788 specifies, in a rule-based manner, metadata elements and their attributes for the description of learning resources. This includes the rules governing the identification of data elements and the specification of their attributes.

These metadata elements are used to form the description of a learning resource, i.e. as a metadata learning resource (MLR) record.

This part of ISO/IEC 19788 provides a base-level data element set for the description of learning resources, from the ISO 15836:2009 Dublin Core metadata element set, using the framework provided in ISO/IEC 19788-1. This provides interoperability at the time of expressing existing Dublin Core records within MLR.

These elements can later be combined with other descriptive elements, including those from other type 1 parts of ISO/IEC 19788 or other standards, including Dublin Core refinements and IEEE 1484.12.1-2002, in order to address more specific topics such as technical or educational information.

**2 Normative references**

1) This part of ISO/IEC 19788 uses Table 2 Terminology code set, hereafter referred to as “ISO 639-2/T”. For additional information, see ISO 639-2:1998, 4.1, Form of language codes.

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO/IEC 19788-1 apply.

NOTE The following terms and definitions from ISO/IEC 19788-1 are the most important for the comprehension of this document.

#### 3.1

##### **content value**

information recorded as the content of the **data element** (ISO/IEC 19788-1:2011, 3.11), in compliance with its **data element specification** (ISO/IEC 19788-1:2011, 3.14)

[ISO/IEC 19788-1:2011, 3.10]

#### 3.2

##### **definition**

representation of a concept by a descriptive statement which serves to differentiate it from related concepts

[ISO/IEC 19788-1:2011, 3.15]

#### 3.3

##### **domain**

⟨data element⟩ **resource class** (3.9) whose **resources** (ISO/IEC 19788-1:2011, 3.30) are described by the **data element** (ISO/IEC 19788-1:2011, 3.11) under consideration

[ISO/IEC 19788-1:2011, 3.16]

#### 3.4

##### **identifier**

sequence of characters capable of uniquely identifying an **entity** (ISO/IEC 19788-1:2011, 3.17)

[ISO/IEC 19788-1:2011, 3.19]

#### 3.5

##### **learning resource**

**resource** (ISO/IEC 19788-1:2011, 3.30) used for learning, education and training

[ISO/IEC 19788-1:2011, 3.20]

#### 3.6

##### **name**

designation of an object by a linguistic expression

[ISO/IEC 19788-1:2011, 3.25]

#### 3.7

##### **range**

⟨data element⟩ **resource class** (3.9) to which the **content values** (3.1) of the **data element** (ISO/IEC 19788-1:2011, 3.11) belong, or set of **literals** (ISO/IEC 19788-1:2011, 3.21) comprising the string representations of the permissible values of the data element under consideration

[ISO/IEC 19788-1:2011, 3.28]

**3.8****refine**

⟨data element specification⟩ have an associated property which is a sub-property of the property associated with

NOTE 1 This implies that the value of the domain attribute of the first data element specification is identical to or a proper subset of the value of the domain attribute of the second data element specification and that the value of the range attribute of the first data element specification is identical to or a proper subset of the value of the range attribute of the second data element specification.

NOTE 2 Data element instances of the first data element specification are said to refine data element instances of the second data element specification.

EXAMPLE 1 Property “is son of” refines property “is child of”.

EXAMPLE 2 Property “has mother” refines property “has parent”.

[ISO/IEC 19788-1:2011, 3.29]

**3.9****resource class**

set of **resources** (ISO/IEC 19788-1:2011, 3.30) that can be identified by listing or description of boundaries and meaning and whose properties and behaviour follow the same **rule** (ISO/IEC 19788-1:2011, 3.32)

NOTE 1 A resource class has the following attributes:

- Identifier;
- Name;
- Definition;
- SubclassOf [multiple inheritance];
- Note.

EXAMPLES *Learning Resource* (set of all learning resources), *Person* (set of all Persons), *Rights* (set of all rights objects), and *Document* (set of all documents).
