Australian/New Zealand Standard™

Software and systems engineering — Certification of software and systems engineering professionals

Part 4: Software engineering

AS/NZS ISO/IEC 24773.4:2023

This Joint Australian/New Zealand Standard™ was prepared by Joint Technical Committee IT-015, Software and Systems Engineering. It was approved on behalf of the Council of Standards Australia on 29 September 2023 and by the New Zealand Standards Approval Board on 04 October 2023.

This Standard was published on 27 October 2023.

The following are represented on Committee IT-015:

- Australian Computer Society
- Australian Digital Health Agency
- Australian Society for Technical Communication, NSW
- Business NSW
- Department of Defence (Australian Government)
- Engineers Australia
- Griffith University
- IT Service Management Forum Australia
- Institute of IT Professionals New Zealand
- Universities New Zealand
- University of New South Wales
- University of Southern Queensland
- University of Technology Sydney

This Standard was issued in draft form for comment as DR AS/NZS ISO/IEC 24773.4:2023.

Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-015, Software and System Engineering.

The objective of this document is to specify requirements and recommendations for certifications schemes based on AS/NZS ISO/IEC 24773.1 which are specific to the domain of software engineering.

This document is identical with and has been reproduced from ISO/IEC 24773-4:2023, *Software and systems engineering — Certification of software and systems engineering professionals — Part 4: Software engineering*.

As this document has been reproduced from an International document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Conformity	1
5 Requirements for certification of software engineering professionals	2
5.1 General	2
5.2 Fundamental components of a conformant scheme	2
5.3 Knowledge	3
5.4 Skill	3
5.5 Competence	3
Annex A (Informative) Elaboration of software engineering knowledge areas	5
Annex B (Informative) Examples of software engineering skills	7
Annex C (Informative) Examples of software engineering competencies	9
Annex D (Informative) Exemplar mapping of competencies to related skills and knowledge	12
Bibliography	15

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information Technology*, Subcommittee SC 7, *Software and systems engineering*.

A list of all parts in the ISO/IEC 24773 series can be found on the ISO and IEC websites.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

Introduction

The ISO/IEC 24773 series addresses the certification of professionals in software and systems engineering. ISO/IEC 24773-1 contains general requirements for such certification schemes. This document contains requirements specific to certification schemes for software engineering professionals.

The concepts, and requirements for certification schemes contained in ISO/IEC 24773-1 and ISO/IEC 17024 apply to this document.
