This Australian Standard® was prepared by Seafood Services Australia Limited. As an accredited Standards Development Organization, Seafood Services Australia Limited develops and publishes seafood standards. The Standard was endorsed on behalf of the Council of Standards Australia on 9 June 2009. It was published on 31/07/2009.

This Standard was issued in draft form for comment as: Australian Fish Names Standard Version 2 April 2008.

Seafood Services Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Fish Names Committee of Seafood Services Australia Ltd. The following are represented on the Fish Names Committee (FNC):

Voting members

Seafood Services Australia (FNC Chair)
Australian Seafood Industry Council (one member)
Seafood Importers Association of Australia (one member)
Recreational Fishing Representative (one member)
Australian Fisheries Managers Forum (two members)
Expertise based members (three members)
Consumer representative (one member)

Non-voting advisers

CSIRO (three members)

Non-voting FNC Secretariat

Seafood Services Australia

Non-voting observers

The FNC invites a wide range of stakeholder interests to participate as observers, including:

Fisheries Research and Development Corporation
Australian Biological Resources Study
Australian Food and Grocery Council
Australian Quarantine Inspection Service Exports
Australian Quarantine Inspection Service Imports
Department of Agriculture, Fisheries and Forestry
Food Standards Australia New Zealand
Aquarium industry
Major grocery retailers

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au.

Australian Standards developed by the Seafood Services Australia (AS SSA Standards) are updated, according to the needs of the industry, by amendments or revision. Users of AS SSA Standards should make sure that they possess the latest amendments or editions.

Representations concerning the need for a change to this Standard should be addressed to:

Introduction

Need for standard fish names

Public and consumer confidence is supremely important to the well being of Australia's \$2.5 billion seafood industry. Standard fish names remove confusion, strengthen consumer confidence, create market efficiency, underpin effective species-based fisheries management, and improve management of food safety.

Australia has over 4500 native species of finfish, and many more crustaceans and molluscs. Several hundred of these species are important commercially, and many others support recreational activities such as fishing and diving. Australia also imports seafood products consisting of many other fish species from around the world to help satisfy the increasing demand for seafood.

Confusion over fish names has been caused by the numerous species Australia has on offer, a species being known by more than one name, or the same name being used for more than one species. As early as the 1920s, meetings were held in Sydney to discuss fish names as the local and regional variations were becoming apparent.

Extensive work on standardizing names used for fish in Australia has been undertaken since the early 1980s by industry, governments, scientists and other stakeholders. Major progress has been made since 1992 as a result of strategic investments by the Fisheries Research and Development Corporation. SSA has maintained this momentum since it accepted responsibility for standardizing fish names in 2001, culminating in the development of this Standard.

The Australian Standard Fish Names Standard includes agreed names for over 600 commercially important domestic and imported species of fish, and over 4,000 other domestic finfish. The process of assigning these agreed names drew on the expertise of several of the world's best fisheries taxonomists and other key stakeholders.

The development and maintenance of this Standard is underpinned by rigorous procedures that have been agreed to by government, industry and other stakeholders over the last two decades and which are administered by SSA and its Fish Names Committee.

Purpose of this Standard

Use of standard fish names in Australia, as defined in this Standard, achieves outcomes that are consistent with the aims of industry and governments, including:

- improved sustainability of fisheries resources (use of standard names by all stakeholders enables more accurate fisheries monitoring and stock assessments)
- improved industry profitability (increased efficiency in seafood marketing and consumer confidence)
- reduced public health risks (more effective management of food safety and seafood related public health incidents)
- reduced potential for misleading and deceptive conduct (more accurate trade descriptors enable consumers to make more informed choices when purchasing seafood).

Preparation of this Standard

SSA is an accredited Standards Australia, Standards Development Organisation.. This Standard was prepared by the SSA's Fish Names Committee (FNC) in accordance with requirements set down for developing Australian Standards. The Standard is the result of a consensus among a wide range of stakeholders and an extensive process of consultation including with the Fish Names Experts Group and the general public.

Fish Names Committee

The membership and operational procedures for the Fish Names Committee (FNC) are specified in SSA's *Fish Names Handbook*. The FNC membership reflects the important role of key stakeholders in the fish names process and ensures that the committee collectively possesses skills and knowledge relating to:

- a. seafood production/harvesting
- b. seafood marketing and trade
- c. promotion and public relations
- d. seafood consumer issues
- e. fish taxonomy and nomenclature
- f. legislation and processes relevant to the import and export of seafood
- g. government operations and processes, including regulatory issues relevant to seafood
- h. industry leadership
- i. corporate governance including the operations of Boards or committees

For a current list of FNC members go to: <http://www.seafood.net.au/fishnames>

Seafood Services Australia

SSA is a not-for-profit company established by the Fisheries Research and Development Corporation and the Australian Seafood Industry Council to be a catalyst for sustainable development of the Australian seafood industry.

1. Scope

This Standard defines standard fish names for use in Australia and specifies when standard fish names are to be used. Annex A lists the approved standard fish names and forms part of this Standard.

1.1 Application

This Standard provides guidance on complying with requirements for the use of standard fish names in Australia, and is intended for use by people and businesses involved with fish or seafood in Australia.

2. Interpretative Guidelines

2.1 Compliance with this Standard

Requirements designated by the words 'shall' or 'shall not' are mandatory for organizations seeking to achieve compliance with this Standard.

Requirements designated by the words 'should' or 'should not' are recommended, but are not mandatory to achieve compliance with this Standard.

2.2 Abbreviations, definitions and terms

2.2.1 Application

For the purpose of this Standard, if there is conflict between the definitions in this document and those in other relevant standards or documents, the definitions herein take precedence.

2.2.2 Abbreviations

Abbreviation	Full Description
AFNS	Australian Fish Names Standard
FNC	Fish Names Committee
FNEG	Fish Names Expert Group
FRDC	Australian Government Fisheries Research and Development Corporation
SFN	standard fish name
SSA	Seafood Services Australia Limited

2.2.3 Terms and definitions

Terms	Definitions
“annex”	an annex to this document is an integral part of the Standard
“attachments”	an attachment to this document is for information and guidance only.
“CAAB Code”	(Codes for Australian Aquatic Biota) consists of eight digits and each species is assigned a unique CAAB Code. This number is unique to Australia.
“fish”	any aquatic vertebrate or invertebrate (excluding mammals and amphibians) in any form, including whole fish, or part thereof, in raw or cooked form, or as a fish product
“obsolete name”	a fish name (other than the current standard fish name) that has been used to describe a species of fish in a commercial setting
“scientific name”	the unique scientific name for a fish determined as per international convention and consisting of a genus name and a species name - the scientific names used in this Standard are those advised by CSIRO Marine and Atmospheric Research or another competent authority.
“standard fish name”	the standard fish name for a species of fish recorded in this standard. A Standard Fish Name (SFN) may cover a single species, or all species in a particular scientific family or group of fish.
“taxonomic group name”	an animal or plant's taxonomic group name as per international convention. The taxonomic group names used in this standard are those advised by CSIRO Marine and Atmospheric Research, or another competent authority

2.3 Footnotes

Footnotes are for information and guidance in interpretation.

3. References

3.1 Application and format

- 3.1.1 If this Standard refers to another document, the other document is a referenced document.
- 3.1.2 Where the edition (or version) of the referenced document is uniquely identified, then that edition (or version) applies.
- 3.1.3 Where the edition (or version) of the referenced document is not uniquely identified, then the applicable edition (or version) is that which is current at the date upon which the document is published.

3.2 Referenced documents

Fish Names Handbook. Procedures for assigning standard fish names and procedures for the Fish Names Committee.

4. Requirements for using standard fish names

4.1 Use of Standard Fish Names

4.1.1 When fish are sold or traded to consumers

Fish sold to consumers (e.g., retail sales and restaurants) shall be identified at the point of sale by the Standard Fish Name (SFN) specified for that species in Annex A of this Standard, and may also be identified by its scientific name.

4.1.2 When fish are sold or traded other than directly to consumers

Fish sold other than directly to consumers (eg, wholesale, export, import) shall be identified by either the SFN or scientific name for that species.

4.1.3 Communication of Fish Names

In publications by scientists, recreational fishers, chefs, media, teachers, fisheries managers, and others; fish shall be identified by either their SFN or the scientific name for that species. (Seafood Services Australia can assist with audits of draft publications).

4.1.4 Standard Fish Names - Scope and Priority

A Standard Fish Name (SFN) may cover a single species, or all species in a particular scientific family or group of fish.

Fish should be identified by the SFN for that particular species only. However, the SFN for the scientific group or family to which a fish belongs may be used if:

- the fish does not have a SFN for that particular species, or
 - the fish is in a batchⁱ of different species of fish, all of which are from the same scientific group or family,
- AND
- using the SFN for the scientific group or family to which a fish belongs, does not mislead, misrepresent or confuse the identification of the fish.

In any instance where a group name is used the group name can be shown capitalised in order to indicate that it is a group name.

Example: a batch of unsorted fish from the family Platycephalidae could be sold with the label displaying Flathead as the applicable group name or could also be shown as FLATHEAD to indicate use of a group name rather than an individual species SFN.

Some group names listed in this standard display a pluralisation in brackets. In these cases the group name is shared with an individual species name. When displaying these group names the pluralised form is optional.

Example: a batch of fish from the genus *Emmelichthys* could be sold using a label displaying any of the following: Redbait, Redbaits, Redbait(s), REDBAIT, REDBAITS or REDBAIT(S).

ⁱ For example, a batch of fish consisting of Dusky Flathead and Tiger Flathead may be identified by the SFN Flathead, which covers all species in the Flathead family.

4.2 Use of other fish names

4.2.1 When other fish names may be used

When a SFN is required to be used under this Standard, species of fish that do not have a SFN specified in Annex A may, subject to 4.2.2, be identified by a name that is commonly used for that species in Australia or overseas.

4.2.2 Notification of use of other fish names

A person or business using another fish name (as per 4.2.1) shall notify SSA of that use within 30 days. SSA will include all such notifications received in accordance with this subsection on the agenda of the next FNC meeting. The FNC may:

- (a) initiate a proposal for a SFN to be assigned for that species, or
- (b) require the person or business using the other name to submit an application for a SFN to be assigned for that species of fish

4.2.3 Display of obsolete fish names

A person or business may display of an obsolete fish name on their point of sale labels only if:

- i) the correct standard fish name is displayed in a more prominent position and larger text than, and above the obsolete name, and
- ii) the obsolete name is qualified by the use of brackets. A qualifying statement e.g. "formerly sold here as" may also be added in the brackets.

History of Revisions

This section describes amendments made to this document since the publication of *The Australian Fish Names Standard As SSA 5300 - 2007*.

Section	Amendment
Page 2	Seafood Services Australia Description updated in line with new funding period.
Introduction	Minor editorial changes to reflect increasing recognition of Standard Fish Names and correction of grammatical errors
All Section	Deleted terminology: Australian Standard Fish Names List and ASFNL
2.2.3	Definition of “obsolete name” added to Term and Definitions section.
Annex A	Removed section: Versions and Titles
4.1	Clause 4.1.3 Communication of Fish Names added. Clause 4.1.4 Standard Fish Names – Scope and Priority - Numbering changed - Information regarding the capitalisation of group names added.
4.2	Clause 4.2.2 added regarding the use of obsolete fish names in point of sale labelling.
Annex A: Introduction	Section titled Categories was removed
	Section titled Format and Content: Addition of statement “where possible” qualifying the inclusion of Authority, Categories and Obsolete Names.

Updates and amendments to Annex A: Standard Fish Names

Annex A. Standard Fish Names

This Annex forms part of this Standard

This Annex lists approved standard fish names and is an integral part of the Australian Fish Names Standard. Lists of standard fish names are available from www.fishnames.com.au. Hard copies of the Standard are available from www.seafood.net.au/shop/ or from Standards Australia.

Format and content

Annex A may be in electronic or hard copy form and shall, when the information exists, include at least: Standard Fish Name; SFN Scope; Scientific name; CAAB Code; and where possible Authorityⁱⁱ; Categories; Obsolete Names.

Updating Annex A

Annex A will be updated as soon as practicable after a new or amended SFN has been approved. Revised scientific names are incorporated when SSA is advised in accordance with this standard.

SSA will make the current official version of the AFNS available for free download from the SSA website.

SSA will email advice of the availability of each revised version of subscribers on SSA's Mailing List which can be subscribed to at www.seafood.net.au.

ⁱⁱ For the authority relevant to the scientific name used in this Standard, refer to the CAAB (database or the Catalogue of Australian Fishes)
