

ANSI/ASABE S608 AUG2008 (R2017)
Headlamps for Agricultural Equipment

**American Society of
Agricultural and Biological Engineers**

STANDARD

ASABE is a professional and technical organization, of members worldwide, who are dedicated to advancement of engineering applicable to agricultural, food, and biological systems. ASABE Standards are consensus documents developed and adopted by the American Society of Agricultural and Biological Engineers to meet standardization needs within the scope of the Society; principally agricultural field equipment, farmstead equipment, structures, soil and water resource management, turf and landscape equipment, forest engineering, food and process engineering, electric power applications, plant and animal environment, and waste management.

NOTE: ASABE Standards, Engineering Practices, and Data are informational and advisory only. Their use by anyone engaged in industry or trade is entirely voluntary. The ASABE assumes no responsibility for results attributable to the application of ASABE Standards, Engineering Practices, and Data. Conformity does not ensure compliance with applicable ordinances, laws and regulations. Prospective users are responsible for protecting themselves against liability for infringement of patents.

ASABE Standards, Engineering Practices, and Data initially approved prior to the society name change in July of 2005 are designated as "ASAE", regardless of the revision approval date. Newly developed Standards, Engineering Practices and Data approved after July of 2005 are designated as "ASABE".

Standards designated as "ANSI" are American National Standards as are all ISO adoptions published by ASABE. Adoption as an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by ASABE.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

CAUTION NOTICE: ASABE and ANSI standards may be revised or withdrawn at any time. Additionally, procedures of ASABE require that action be taken periodically to reaffirm, revise, or withdraw each standard.

ANSI/ASABE S608 AUG2008 (R2017)

Reaffirmed December 2017 as an American National Standard

Headlamps for Agricultural Equipment

This standard was developed by the ASABE Lighting and Marking Subcommittee and approved by the Power and Machinery Tractor Committee. The adoption of this standard was made possible by the signing of 2004 SAE-ASABE copyright agreements, which gave ASABE a royalty-free license to publish in whole or in part SAE standard document J975, Headlamps for Agricultural Equipment. Adopted by ASABE and approved as an American National Standard August 2008; reaffirmed November 2013, December 2017.

Keywords: Agricultural equipment, Headlamps, Lighting, Safety

1 Scope

This Standard provides performance and general design requirements and related test procedures for headlamps for use on agricultural equipment that may be operated on public roads.

2.1 Applicable Publications. The following publications form a part of this specification to the extent specified herein. The latest issue of SAE publications shall apply.

2.1.1 SAE PUBLICATIONS: Available from SAE, 400 Commonwealth Drive, Warrendale, PA 15096-0001.

SAE J573 — Miniature Lamp Bulbs

SAE J578 — Color Specification

SAE J2139 Test for Signal and Marking Devices Used on Vehicles of 2032 mm or More in Overall Width

3 Definitions

A headlamp for agricultural equipment is a lighting device used to provide general illumination ahead of the vehicle.

4 General Requirements

The following sections from SAE J2139 are part of this document:

Section 3.7 Samples

Section 3.8 Sealed Lighting Devices

Section 4.1 Vibration Test

Section 4.2 Moisture Test

Section 4.3 Dust Test
