Aspirin Effervescent Tablets for Oral Solution

DEFINITION

Aspirin Effervescent Tablets for Oral Solution contain Aspirin and an effervescent mixture of a suitable organic acid and an alkali metal bicarbonate and/or carbonate. Tablets contain NLT 90.0% and NMT 110.0% of the labeled amount of aspirin ($C_9H_8O_4$).

IDENTIFICATION

- **A.** The retention time of the aspirin peak of the *Sample solution* corresponds to that of the *Standard solution*, as obtained in the Assay.
- **B.**

Sample: ½ Tablet

Analysis: Add the *Sample* to 50 mL of water in a flask, and immediately stopper with a stopper fitted with tubing so that the evolved gas passes through [calcium hydroxide TS](#).

Acceptance criteria: A white precipitate forms.

ASSAY

PROCEDURE

Mobile phase: 2 g/L of [sodium 1-heptanesulfonate](#) in a mixture of [acetonitrile](#) and [water](#) (15:85). Adjust with [glacial acetic acid](#) to a pH of 3.4.

Diluent: [Acetonitrile](#) and [formic acid](#) (99:1)

Standard solution: 0.5 mg/mL of [USP Aspirin RS](#) in *Diluent*

Sample stock solution: Nominally 5 mg/mL of aspirin prepared as follows. Transfer a quantity, equivalent to about 100 mg of aspirin from NLT 20 finely powdered Tablets, to a suitable container. Add 20.0 mL of *Diluent* and 10 glass beads. Shake vigorously for 10 min, and centrifuge.

Sample solution: Nominally 0.5 mg/mL of aspirin in *Diluent* from *Sample stock solution*

Chromatographic system

(See [Chromatography \(621\), System Suitability](#).)

Mode: LC

Detector: UV 280 nm

Column: 4-mm × 30-cm; packing L1

Flow rate: 2 mL/min

Injection volume: 10 µL

System suitability

Sample: *Standard solution*

Suitability requirements

Tailing factor: NMT 2.0

Relative standard deviation: NMT 2.0%

Analysis

Samples: *Standard solution* and *Sample solution*

Calculate the percentage of the labeled amount of aspirin ($C_9H_8O_4$) in the portion Tablets taken:

$$\text{Result} = (r_U/r_S) \times (C_S/C_U) \times 100$$

r_U = peak response of aspirin from the *Sample solution*

r_S = peak response of aspirin from the *Standard solution*

C_S = concentration of [USP Aspirin RS](#) in the *Standard solution* (mg/mL)

C_U = nominal concentration of aspirin in the *Sample solution* (mg/mL)

Acceptance criteria: 90.0%–110.0%

PERFORMANCE TESTS

- **SOLUTION TIME:** NMT 5 min for 2 Tablets completely dissolved in 180 mL of water at $17.5 \pm 2.5^\circ$.
- **UNIFORMITY OF DOSAGE UNITS (905):** Meet the requirements

IMPURITIES• **LIMIT OF FREE SALICYLIC ACID**

Mobile phase, Diluent, and Chromatographic system: Proceed as directed in the Assay.

System suitability solution: 0.015 mg/mL of [USP Salicylic Acid RS](#) and 0.5 mg/mL of [USP Aspirin RS](#) in *Diluent*

Standard solution: 0.015 mg/mL of [USP Salicylic Acid RS](#) in *Diluent*

Sample solution: Use the *Sample stock solution* prepared as directed in the Assay.

System suitability

Samples: *System suitability solution* and *Standard solution*

[NOTE—The relative retention times for salicylic acid and aspirin are 0.7 and 1.0, respectively.]

Suitability requirements

Resolution: NLT 2.0 between salicylic acid and aspirin, *System suitability solution*

Relative standard deviation: NMT 4.0%, *Standard solution*

Analysis

Samples: *Standard solution* and *Sample solution*

Calculate the percentage of salicylic acid ($C_7H_6O_3$) in the portion of Tablets taken:

$$\text{Result} = (r_U/r_S) \times (C_S/C_U) \times 100$$

r_U = peak response of salicylic acid from the *Sample solution*

r_S = peak response of salicylic acid from the *Standard solution*

C_S = concentration of [USP Salicylic Acid RS](#) in the *Standard solution* (mg/mL)

C_U = nominal concentration of aspirin in the *Sample solution* (mg/mL)

Acceptance criteria: NMT 8.0%

SPECIFIC TESTS

- [ACID-NEUTRALIZING CAPACITY \(301\)](#): NLT 5.0 mEq of acid is consumed by 1 Tablet.

ADDITIONAL REQUIREMENTS

- **PACKAGING AND STORAGE:** Preserve in tight containers.

- [USP REFERENCE STANDARDS \(11\)](#).

[USP Aspirin RS](#)

[USP Salicylic Acid RS](#)

Auxiliary Information - Please [check for your question in the FAQs](#) before contacting USP.
