

Designation: B 619 – 04

Standard Specification for Welded Nickel and Nickel-Cobalt Alloy Pipe¹

This standard is issued under the fixed designation B 619; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope*

1.1 This specification² covers welded pipe of nickel and nickel-cobalt alloys (UNS N10001; UNS N10242; UNS N10665; UNS N12160; UNS N10624; UNS N10629; UNS N10675; UNS N10276; UNS N06455; UNS N06007; UNS N06975; UNS N08320; UNS N06002; UNS N06022; UNS N06035; UNS N06058; UNS N06059; UNS N06200; UNS N06985; UNS N06030; UNS R30556; UNS N08031; UNS N06230; UNS N06686; UNS N06210; and UNS R20033)* as shown in **Table 1**.

1.2 This specification covers pipe in Schedules 5S, 10S, 40S, and 80S through 8-in. nominal pipe size as set forth in ANSI **B36.19** (see **Table 2**).

1.3 Two classes of pipe are covered as follows:

1.3.1 *Class I*—As welded and solution annealed or welded and sized and solution annealed.

1.3.2 *Class II*—Welded, cold worked, and solution annealed.

1.4 All pipe shall be furnished in the solution annealed and descaled condition. When atmosphere control is used, descaling is not necessary.

1.5 The values stated in inch-pound units are to be regarded as the standard. The values given in parentheses are for information only.

1.6 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to become familiar with all hazards including those identified in the appropriate Material Safety Data Sheet for this product/material as provided by the manufacturer, to establish appropriate safety and health practices, and determine the applicability of regulatory limitations prior to use.*

2. Referenced Documents

2.1 *ASTM Standards*:³

2.2 *ANSI Standards*:

B36.19 Stainless Steel Pipe⁴

B2.1 Pipe Threads⁴

3. General Requirement

3.1 Material furnished under this specification shall conform to the applicable requirements of Specification **B 775** unless otherwise provided herein.

4. Ordering Information

4.1 It is the responsibility of the purchaser to specify all requirements that are necessary for material ordered under this specification. Examples of such requirements include, but are not limited to the following:

4.1.1 *Alloy* (**Table 1**),

4.1.2 *Class* (see **1.3**),

4.1.3 *Quantity* (feet or number of lengths),

4.1.4 *Size* (nominal size or outside diameter and schedule number or average wall thickness),

4.1.5 *Length*—Specify cut length or random,

4.1.6 *Certification*—State if certification or a report of test results is required,

4.1.7 *Purchaser Inspection*—State which tests or inspections are to be witnessed,

4.1.8 *Ends*—Plain ends cut and deburred will be furnished, unless otherwise specified, and

4.1.9 *Samples for Product (Check) Analysis*—State whether samples shall be furnished.

¹ This specification is under the jurisdiction of ASTM Committee **B02** on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee **B02.07** on Refined Nickel and Cobalt and Their Alloys.

Current edition approved Feb. 1, 2004. Published February 2004. Originally approved in 1981. Last previous edition approved in 2000 as B 619 – 00.

² For ASME Boiler and Pressure Vessel Code applications see related Specification SB-619 in Section II of that Code.

* New designation established in accordance with Practice E 527 and SAE J1086, Practice for Numbering Metals and Alloys (UNS).
