GIS 65-215

DRAFT - Floating Production Facility Weight Control (ISO 19901-5)

Group Practice

**BP GROUP
ENGINEERING TECHNICAL PRACTICES**

Foreword

Add

This is the first issue of Group Instruction for Supply (GIS) on ISO 19901-5 Petroleum and Natural Gas Industries - Specific Requirements for Offshore Structures - Part 5: Weight control during engineering and construction, Revision 2003.

The GIS document provides guidance and clarification on ISO 19901-5, specifically for floating structures and details areas where BP has additional, higher, or different requirements as compared to the ISO document.

The objective is to use ISO 19901-5 and this GIS as the basis for preparing integrity management plans for weight management of BP floating facilities worldwide.

Table of Contents

	Page
1 Scope	6
1.1 Application	6
1.2 Background	6
1.3 Objectives	6
1.4 BP guidance framework	6
1.5 Roles and responsibilities	6
2 Normative references	6
3 Terms, definitions, and abbreviated terms	7
3.2 Abbreviated terms	7
4 Weight control classes	7
4.1 General	7
5 Weight and load budget (WLB)	7
5.1 General	7
5.2 Requirements	8
5.3 Weight and load budget (WLB) content	8
5.3.1 General	8
5.3.3 Weight reserves	8
5.3.4 Future weights and loads	9
5.3.5 Loading conditions and parameters	9
5.3.5.2 Loading condition selection	9
6 Weight reporting	9
6.1 General	9
6.2 The weight control procedure	9
6.3 Requirements to the weight report	10
6.3.1 Introduction to the report	10
6.3.2.3 Global CoG plots	10
6.3.3 Area/module reports	10
6.3.3.4 Area weight printouts	10
7 Requirements for weight data from suppliers and weighing of bulk and equipment	10
7.3 Requirements for weighing	10
7.4 Weighing equipment	10
8 Requirements for weighing of major assemblies	11
8.3 Weighing	11

8.3.1 Number and timing of weighings	11
8.3.6 Calibration of weighing system	11
8.3.7 Foundation and supports	11
10 Displacement check and inclining test	11
11 Weight management during installation	12
11.1 General	12
11.2 Tracking ballast	12
11.3 Tracking mooring and riser loads	13
11.4 Tracking temporary installation equipment	13
11.5 Draught measurement	13
12 Weight management during operation	13
12.1 General	13
12.2 Weight reconciliation and phantom weight	13
12.3 Permanent weight additions	14
12.4 Temporary weight additions	14
12.5 Drilling, completion, and workover variable loads	14
13 Weight and buoyancy bookkeeping	14

Introduction

Add

- a. Requirements for weight control and weight management are based on International Organization for Standardization (ISO) 19901-5, Petroleum and natural gas industries - Specific requirements for offshore structures - Part 5: Weight control during engineering and construction.
- b. Requirements of this GIS are modifications to ISO 19901-5.
- c. Modifications to ISO 19901-5 are identified as Add, Modify to Read, or Delete.
- d. Paragraph numbers in this specification correspond to ISO 19901-5.
- e. Paragraphs of ISO 19901-5 that are not revised remain applicable.
