Guidance on Practice for Pipe Handling Logistics for Pipelines

GP 43-32

BP GROUP
ENGINEERING TECHNICAL PRACTICES

Foreword

This is the first issue of BP Engineering Technical Practice (ETP) GP 43-32. This document will be updated on a periodic basis to include new BP experiences and any additional pipe handling logistics' mandatory requirements. This is not a standalone document; it must be used in accordance with the requirements of ETP document PR 43: Status of ETP Pipeline Documents. In addition to the requirements for this document, those of relevant BP group standards also have to be fulfilled.

	Page
Foreword	2
Introduction	4
1. Scope	5
2. Normative references.....	5
3. General guidance	5
3.1. General	5
3.2. The pipe supply chain	6
3.3. Pipe tracking	6
3.4. Supply chain simulation modelling	7
3.5. Examples of simulation modelling	7
3.6. Pipe handling and lifting	7
3.7. Pipe transportation.....	9
3.8. Pipe storage.....	11
Bibliography	13

Introduction

This document provides access to the repository of BP experience in pipe handling logistics for pipelines. This includes items such as specifications, examples, lessons learnt, success stories, and failures. Mandatory pipe handling logistics requirements are contained in the body of this document.
