

April 2004

PR 82

CATEGORY 82 - LUBRICANTS

THIS CATEGORY NOW CONTAINS ETP DOCUMENTS.

These documents, and those that will be added during 2004, are specific to Lubricants Supply Chain blending plants and associated operations. They have been, or will be, approved by the LSC Engineering Network. This category also contains Shared Learnings and Guidance Notes that have been validated by this Network. Please go to the **ETP SHARED LEARNING SYSTEM** and search for “validated” and “awaiting validation” Shared Learnings <http://etpsl.bpweb.bp.com/>

Lubricants Supply Chain can utilize other ETPs where these are appropriate. Categories of ETPs that could be applicable to Lubricants and the rest of BP would be:

#12 Electrical, #34 Machinery, #30 Instruments & Controls, #26 Heat Exchangers, #46 Pressure Vessels, #42 Piping, and #62 Valves.

Please refer to the **ETP PROJECT HOMEPAGE** and select “List of published ETP documents” to find out when categories will contain documents and what documents have been published to date <http://etp.bpweb.bp.com/>

When viewing a document in this Category, you can click on “Create a comment relating to this document” and your comments will be sent directly to the LSC Engineering Network experts.

For further guidance on the application of these ETPs and Shared Learnings, please contact the LSC Engineering Team (Ross Smith smitr2@bp.com or Ralph Morgan morganr4@bp.com)

Downloaded Date: 6/17/2008 11:45:49 PM

The latest update of this document is located in the BP ETP and Project Library

Documents
AA Document Sharing Hub

If you cannot find a current ETP in the area that you are searching for, please choose and use one of the Heritage document sets in the “Browse by document type” list.
