**Auxiliary table 1e (71+73) —
Common auxiliaries of place for Canada
and the United States of America.
Extended edition**

ICS 01.140.20

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee IDT/3, Universal Decimal Classification, upon which the following bodies were represented:

- Library Association
- National Information Services and systems (NISS)
- Society of Indexers
- Standing Conference of National and University Libraries
- University of Bristol

This British Standard, having been prepared under the direction of the DISC Board, was published under the authority of the Standards Policy and Strategy Committee on 10 October 2001

Foreword

This British Standard has been prepared by Technical Committee IDT/3. BS 1000 Aux 1e (71 + 73):2001 replaces BS 1000 Aux I(e)-3:1993 which was withdrawn on 15 December 1998.

The Universal Decimal Classification (UDC) was originally derived from the Dewey Decimal Classification (DDC) and was managed by the organization eventually known as the International Federation for Information and Documentation (FID). It is now the property of the UDC Consortium (UDCC), which was inaugurated on 1 January 1992 with BSI as a founder member. Information about the UDCC can be found on its website at www.udcc.org or obtained from:

The Director
UDC Consortium
PO Box 90407
2509 LK The Hague
Netherlands
email: udc@kb.nl

The official text of the UDC is the Master Reference File (MRF), the database of about 61 000 entries maintained for the UDCC at the Royal Library in the Hague. BSI is the publisher of the English editions, and BS 1000M-1 is derived from the MRF. The version previously known as the “full edition”, totalling about 220 000 entries and published in sections, is no longer maintained at that level, but some publishers issue certain sections at a similar level of detail. These are now called “extended editions”.

This extended edition of part of UDC Auxiliary Table 1e, *Common auxiliaries of place*, contains material authorized in *Extensions and Corrections to the UDC*, number **21**, November 1999 [1] (for Canada) and number **22**, November 2000 [2] (for the USA). This material is accepted by the UDCC Executive Committee as a recognized extension to the MRF.

The UDC common auxiliaries of place, signified by “brackets one-to-nine” (1/9), indicate the geographical range, locality or other spatial aspect of an item of information. They may be cited with main numbers when the place aspect is secondary, or combined with different auxiliaries or other place auxiliaries. They may also be used independently, so creating a sequence in which the place facet is the only one expressed — for instance, in indexing certain kinds of map. For examples of use and of combination with other numbers, see the Standard or Medium Edition (BS 1000M) or the Pocket Edition (DISC PD 1000) of the UDC.

The complete tables of the UDC are available in BS 1000M and its supplements. Further information can be found in *The Universal Decimal Classification. A guide to its use* [3].

Every effort has been made to ensure the accuracy of the information in this publication, but no liability is accepted for errors that may have occurred. The names used, the selection and sequence of regions, descriptive expressions and relations implied by the numeric hierarchy do not constitute any endorsement of their national or international status either by BSI or by any of its cooperating organizations. No opinions about any of these matters should be inferred from this publication.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 113 and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

1 Scope

This extended edition of part Table 1e contains the administrative divisions of Canada, down to Administrative Regions, Municipalities and Urban Communities; and the administrative divisions of the USA, down to the primary divisions of individual states (Counties, Boroughs and Parishes). Census areas are used for those parts of Alaska that do not yet have formally constituted local government.

As there will often be a need for tables at an extended level of detail for the user's own country and for certain other users specializing in information about the country concerned, the tables for the USA are subdivided to a greater level of detail than those in the Master Reference File (see the Foreword), but are compatible with it.

2 Other features

Though the principle of division is administrative, physical features are also mentioned, particularly if they are coextensive with an administrative unit, for example:

(734.711.6) Borough of Richmond (= Richmond County = Staten Island)

or when they form a useful grouping device, for example:

(716.3) Bay of Fundy counties [Nova Scotia]

(736.411/.413) Counties around the Gulf of Mexico [Texas]

US cities with the official title of "Independent City" are coordinate with counties, for example:

(737.855.6) St. Louis County

(737.855.8) Independent City of St. Louis

State capitals in the USA are listed with the counties within which they are located, and signalled by the addition of the words "(state capital)", for example:

(734.8) Pennsylvania

(734.813.2) Dauphin County

Including: Harrisburg (state capital)

The state capitals are not separately notated unless they also have the status of Independent City, for example:

(735.5) Virginia

(735.542.7) Independent City of Richmond (state capital)

or dual status:

(738.8) Colorado

(738.855.4) City and County of Denver (state capital)

If preferred, all capitals can be classed immediately following their country, state or province, using the –25 auxiliary valid throughout this table, for example:

(71–25) Capital of Canada (Ottawa)

(713–25) Capital of Ontario (Toronto)

(73–25) Capital of the USA (Washington DC)

(734.8–25) Capital of Pennsylvania (Harrisburg)

3 Structure and notation

As a result of the revision of sections (71) and (73) of Table 1e, the notation is expressive and searchable by truncation, as the notational subdivisions for each country now match the administrative subdivisions — in contrast to the earlier arrangement in which the USA as a whole was denoted by (73) but the individual states occupied the range (74) to (79). The revised notation is structured as follows:

(71)	2-digit number:	CANADA
	3-digit numbers:	PROVINCES
	4- and 5-digit numbers:	Regions, Municipalities, Urban Communities
(73)	2-digit number:	UNITED STATES OF AMERICA
	3-digit numbers:	REGIONS
	4-digit numbers:	STATES (and the District of Columbia)
	7-digit numbers:	Counties, Boroughs, Parishes

4 Terminology

The favoured terminology of the individual states and provinces is followed. In the USA, the subdivisions of states are mostly designated as “Counties”, though in a few cases they are called “Boroughs”, and in one state, Louisiana, “Parishes”. They all have the same administrative rank.

The term *Including* has no administrative significance; it is used here purely as a grouping device to class entities with the geographic area in which they are located.

5 Further information

More information about the background to these revisions and about sources of further information, both in print form and on websites, may be found in the relevant issues of *Extensions and Corrections to the UDC* [1], [2].

6 Explanation of symbols

The symbols in the left margins of the tables indicate the relation of the entries to those in previous English editions:

–	Existing number and text
+	New number and text
x	Cancelled number and text (these entries are in small type)
!	Modified text (same number)

These symbols do not form part of the UDC number.

The following symbol occurs within UDC entries:

→	See also
---	----------

For an explanation of the UDC auxiliary symbols, other notation and their filing order, see the introductions to the Standard or Medium Edition (BS 1000M) or the Pocket Edition (PD 1000).

Haven, Holman, Pelly Bay, Spence Bay, Umingmaktok

Canada — Index

This index was computer-generated with minimum intervention. The alphabetic order is word by word. Prepositions and conjunctions are disregarded. Entries beginning with the same word are not merged if the opening words are inseparable parts of a proper name, e.g.:

Fort Franklin (719.22);

Fort Macleod (712.34).

Forms such as 'Mac'/'Mc', 'Saint'/'St.' etc. are filed as found.
