

Methods for

Analysis and testing of coal and coke —

Part 112: Determination of Hardgrove
grindability index of hard coal

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee SFI/3, Analysis and testing of coal and coke, upon which the following bodies were represented:

- British Cement Association
- British Coal Corporation
- British Gas plc
- British Steel Industry
- Electricity Association
- GAMBICA (BEAMA Ltd.)
- Power Generation Contractors Association PGCA (BEAMA Ltd.)

This British Standard, having been prepared under the direction of the Materials and Chemicals Sector Board (I/-), was published under the authority of the Standards Board and comes into effect on 15 April 1995

National foreword

This British Standard has been prepared by Technical Committee SFI/3 and is identical to ISO 5074:1994 *Hard coal — Determination of Hardgrove grindability index*, published by the International Organization for Standardization (ISO) and in the preparation of which the United Kingdom played a full part.

This British Standard is a revision of BS 1016-20 which is withdrawn. BS 1016-20 is renumbered as Part 112 under a scheme for rationalizing and restructuring BS 1016. The Parts numbered from 1 to 21 are gradually being withdrawn and replaced by Parts in the new series. The full list of Parts in the new series, together with corresponding numbering of the old series and related ISO standards is given in BS 1016 *Analysis and testing of coal and coke* — Part 100:1994 *General introduction and sampling report*.

Cross-references. A British Standard related to ISO 1988:1975 is BS 1017-1:1989 *Methods for sampling of coal*. ISO 1988 is being revised in conjunction with ISO 2309 *Coke — Sampling*, ISO 9411 *Solid mineral fuels — Mechanical sampling from moving streams* — Part 1: *Coal* and Part 2: *Coke*. This revision will be published in eight Parts, and it is intended to implement these Parts as identical British Standards superseding BS 1017.

A British Standard related to ISO 3310-1:1990 is BS 410:1986 *Specification for test sieves*.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 7 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
