ENGINEERING STANDARDS COMMITTEE

PREFACE.

The Sectional Committee on Bridges and General Building Construction was appointed by the Main Committee on July 19th, 1901.

Having, in conjunction with the Sectional Committee on Ships' Sections and the Sectional Committee on Railway Rolling Stock Underframes, completed the Standard list of Rolled Sections for Structural purposes, the Committee next turned their attention to a Standard Specification for Structural Steel for Bridges and General Building Construction. The draft of the Specification was submitted to the Science Standing Committee of the Royal Institute of British Architects, and certain modifications have been introduced into the Specification as a result of the co-operation of that Committee. The Specification was adopted by the Sectional Committee on Bridges and General Building Construction at their meeting held on May 23rd, 1906.

This Report was approved by the Main Committee at their meeting held on June 19th, 1906.

B. BAKER,

*Chairman of the Sectional Committee on Bridges
and General Building Construction.*
