BRITISH STANDARDS INSTITUTION

INCORPORATED BY ROYAL CHARTER

BRITISH STANDARDS HOUSE, 2 PARK ST., LONDON, W.1

TELEGRAMS: STANDARDS, AUDLEY, LONDON TELEPHONE: MAYFAIR 9000

THIS BRITISH STANDARD, having been approved by the Non-Ferrous Metals Industry Standards Committee and endorsed by the Chairman of the Engineering Divisional Council, was published under the authority of the General Council on 7th September, 1953.

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards numbering over 2000, indexed and cross-indexed for reference, together with an abstract of each standard, will be found in the Institution's Yearbook, price 12s. 6d.

This standard makes reference to the following British Standards:—

- B.S. 18. Tensile testing of metals.
- B.S. 61 : Part 1. Copper tubes (heavy gauge) for general purposes.
- B.S. 61 : Part 2. Screw threads for copper tubes.
- B.S. 1172. Phosphorus deoxidized non-arsenical copper.
- B.S. 1174. Phosphorus deoxidized arsenical copper.
- B.S. 1306 : Part 2. Seamless copper tubes for steam services.
- B.S. 1499. Sampling non-ferrous metals.
- B.S. 1800. Methods for the analysis of raw copper.

British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions.

SPECIFICATION

SECTION ONE : GENERAL CLAUSES

1. Scope	7
2. Manufacture	7
3. Quality of material	7
4. Chemical test	8
5. Freedom from defects	8
6. Dimensions	8
7. Pressure test	9
8. Mechanical tests	9
a. Testing facilities	9
b. Number of tests and selection of test specimens	9
c. Re-tests	10
d. Drifting test	10
e. Flattening and doubling-over test	10
f. Tensile test	11
9. Inspection	11
10. Certificate of compliance	12
11. Independent tests	12

TABLES

1. Tensile properties	11
2. Tolerances on outside diameter	12
3. Tolerances on outside diameter	12
4. Tolerances on thickness	13
5. Tolerances on length	14

SECTION TWO : SPECIFIC CLAUSES

12. Copper tubes for use in refrigeration plant	14
