BRITISH STANDARDS INSTITUTION
INCORPORATED BY ROYAL CHARTER
BRITISH STANDARDS HOUSE, 2 PARK ST., LONDON, W.1
TELEGRAMS: STANDARDS, AUDLEY, LONDON TELEPHONE: MAYFAIR 9000

THIS BRITISH STANDARD, having been approved by the Non-ferrous Metals Industry Standards Committee and endorsed by the Chairman of the Engineering Divisional Council, was published under the authority of the General Council on 30th December, 1960.

First published, May, 1926.

First revision, May, 1940.

Second revision, December, 1960.

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 3000, indexed and cross-indexed for reference, together with an abstract of each standard, will be found in the Institution's Yearbook, price 15s.

This standard makes reference to the following British Standards:

B.S. 18. Tensile testing of metals.

B.S. 218. Brass bars and sections (suitable for forgings) and drop forgings.

B.S. 350. Conversion factors and tables.

B.S. 1420. Glossary of terms applicable to wrought products in copper, zinc, brass and other copper alloys.

B.S. 1499. Sampling non-ferrous metals.

B.S. 1748. Methods for the analysis of copper alloys.

B.S. 1957. Presentation of numerical values (fineness of expression; rounding of numbers).

The following B.S.I. references relate to the work on this standard:
