

Specification

Dimensions of rivets —

($\frac{1}{2}$ Inch to $1\frac{3}{4}$ inch diameter) —

**This specification does not apply to
boiler rivets**

Co-operating organizations

The following Government departments and scientific and industrial organizations were officially represented upon the committees entrusted with the preparation of this British Standard:—

- Admiralty
- Board of Trade
- Boiler Manufacturers' Association
- Bridge & Constructional Ironwork Association
- British Corporation for the Survey and Registry of Shipping
- Bureau Veritas
- Crown Agents for the Colonies
- English & Scottish Forgemasters' Association
- English & Scottish Steelfounders' Association
- Federated Forgemasters' Association
- India Office
- Institution of Engineers and Shipbuilders in Scotland
- Institution of Naval Architects
- Institution of Structural Engineers
- Iron and Steel Institute
- Iron and Steel Trades Employers' Association
- Lloyds Register
- Locomotive Manufacturers' Association
- London County Council
- Midland Forgemasters' Association
- National Federation of Iron and Steel Manufacturers
- North East Coast Institution of Engineers and Shipbuilders
- North East Coast of England Rivet Manufacturers' Association
- Railway Carriage and Wagon Builders' and Financiers' Parliamentary Association
- Railway Companies of Great Britain
- Rivet Makers' Association
- Royal Institute of British Architects
- Scottish Bar Iron Manufacturers' Association
- South Staffordshire Ironmasters' Association
- War Office

This British Standard was adopted by the Sectional Committee on Bridges and Building Construction on April 29th, 1927, and by the Sectional Committee on Sections and Tests for Materials used in the Construction of Ships and their Machinery on May 3rd, 1927. It was approved on behalf of the Main Committee on May 23rd, 1927.

Foreword

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

The figures in British measures are to be regarded as the standard. Approximate metric equivalents are given for the convenience of users in countries in which the metric system has been generally adopted.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over five thousand, indexed and cross-indexed for reference, together with an abstract of each standard, will be found in the Institution's Yearbook.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 7 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
