Table D.1 — Resistance-bridge performance characteristics	6

National foreword

This British Standard reproduces verbatim ISO 11413:1996 and implements it as the UK national standard.

The UK participation in its preparation was entrusted by Technical Committee PRI/61, Plastics piping systems and components, to Subcommittee PRI/61/4, Methods of test for thermoplastics piping systems and components, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request.

Cross-references

This international standard is incorporated into BS 2782 Methods of testing plastics: Part 11: Thermoplastics pipes, fittings and valves, as Method 1150E:1996, for association with related test methods for plastics materials and plastics piping components.

British Standards which implement international or European publications referred to in dual numbered standards may usually be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or using the “Find” facility of the BSI Standards Electronic Catalogue.

Reference is made to ISO 4427, for which there is no identical British Standard because the corresponding British Standards are expected to be replaced by implementation of the collected Parts of EN 12201 when they are finalized.

Reference is made to ISO 4437, ISO 8085-2 and ISO 8085-3, for which there are no identical British Standards because the corresponding British Standards are expected to be replaced by implementation of the collected Parts of EN 1555 when they are finalized.

WARNING NOTE. This British Standard, which is identical with ISO 11413:1996, does not necessarily detail all the precautions necessary to meet the requirements of the Health and Safety at Work etc. Act 1974. Attention should be paid to any appropriate safety precautions and the method should be operated only by trained personnel.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, page ii, pages 1 to 6 and a back cover

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
