

Methods of testing

Plastics —

Part 3: Mechanical properties —

**Method 323A: Tensile vibration —
Non-resonance method**

ICS 83.080

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee PRI/21, Testing of plastics, upon which the following bodies were represented:

- British Apparel and Textile Confederation
- British Plastics Federation
- Department of the Environment (Building Research Establishment)
- Department of Trade and Industry (National Physical Laboratory)
- Electrical and Electronic Insulation Association (BEAMA Ltd.)
- GAMBICA (BEAMA Ltd.)
- Institute of Materials
- Ministry of Defence
- Packaging and Industrial Films Association
- PIRA International
- RAPRA Technology Ltd.
- Royal Society of Chemistry

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 September 1996

National foreword

This British Standard has been prepared by Technical Committee PRI/21 and is identical with ISO 6721-4:1994 *Plastics — Determination of dynamic mechanical properties — Part 4: Tensile vibration — Non-resonance method* published by the International Organization for Standardization (ISO).

ISO 6721-4 is one of a ten part series of ISO 6721 methods of determination of the dynamic mechanical properties of rigid plastics. ISO 6721-1, implemented as BS EN ISO 6721-1 (dual numbered BS 2782-3: Method 342A), is an introductory section which includes the definitions and all aspects that are common to the individual test methods described in the subsequent versions.
