National foreword

This revision of this British Standard, which has been prepared under the direction of the Fibres, Yarns, Fabrics and Production Standards Committee, supersedes BS 2861:1972, which is withdrawn. It is identical with ISO 7211:1984 “*Textiles — Woven fabrics — Construction — Methods of analysis — Part 1: Methods for the presentation of a weave diagram and plans for drafting, denting and lifting*” published by the International Organization for Standardization (ISO).

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

Where the words “International Standard” and “this part of ISO 7211” appear, referring to this standard, they should be read as “British Standard” and “BS 2861”, respectively.

Cross-references

International Standard	Corresponding British Standard
ISO 3572:1976	BS 5523:1977 <i>Glossary of terms for textiles — Weaves — Definitions of general terms and basic weaves</i> (Identical)

The Technical Committee has reviewed the provisions of ISO 2959, to which reference is made in the text, and has decided that they are acceptable for use in conjunction with this standard. A related standard for ISO 2959 is BS 946 “*Method for the designation of yarns*”.

NOTE *Typographical error.* In 6.4, line 4, for “thought” read “through”.
A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
