

Methods of testing cellulose acetate flake

[UDC 678.544.4:678.01]

Co-operating organizations

The Plastics Industry Standards Committee, under whose supervision this Addendum was prepared consists of representatives of the following Government departments and scientific and industrial organizations:

- Admiralty
- Board of Trade
- British Electrical and Allied Industries Research Association
- British Electrical and Allied Manufacturers' Association.
- British Plastics Federation*
- D.S.I.R. — Building Research Station
- Electronic Engineering Association
- Ministry of Supply*
- Oil Companies Materials Association
- Plastics Institute*
- Post Office*
- Royal Institute of British Architects

The Government departments and scientific and industrial organizations marked with an asterisk in the above list, together with the following, were directly represented on the Committee entrusted with the preparation of this Addendum:

- British Colour Makers Association
- British Cotton Industry Research Association
- Individual manufacturers

This Addendum, having been approved by the Plastics Industry Standards Committee and endorsed by the Chairman of the Chemical Divisional Council, was published under the authority of the General Council on 10 August 1959

Figure 3 — Mould	6

Foreword

This Addendum makes reference to the following British Standards:

BS 410, *Test sieves*.

BS 509, *Acetone*.

BS 663, *Ethyl lactate*.

BS 1996, *Dimethyl phthalate*.

BS 1997, *Glycerol triacetate (triacetin)*.

This Addendum has been published under the authority of the Plastics Industry Standards Committee.

It provides three further test methods which had not been completed when BS 2880, "*Methods of testing cellulose acetate flake*", was published, namely determination of insoluble particles, determination of original colour and colour after heating of plasticized cellulose acetate and determination of viscosity loss on moulding.

NOTE Where metric equivalents have been given the figures in British units are to be regarded as the standard. The metric conversions are approximate. More accurate conversions should be based on the tables in BS 350, "*Conversion factors and tables*".

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
