Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Disinfectants Standards Committee (DIC/-) to Technical Committee DIC/1, upon which the following bodies were represented:

- Association of District Councils
- British Association for Chemical Specialities
- Caravan Club
- Chemical Industries Association
- Consumer Policy Committee of BSI
- Department of Trade and Industry (Laboratory of the Government Chemist)
- Institution of Environmental Health Officers
- Society of Chemical Industry
- Water Authorities Association

This British Standard, having been prepared under the direction of the Disinfectants Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 July 1989

Foreword

This revision of this British Standard has been prepared under the direction of the Disinfectants Standards Committee. It supersedes BS 2893:1957, which is withdrawn.

The chemical preparations usually contain biocidal ingredients, colouring and wetting agents and may contain re-odourizing agents for masking odours and are intended to be used in one or more of the following types of closet:

- a) non-flushing closets;
- b) flushing closets of the non-recirculating type;
- c) flushing closets of the recirculating type;

including those complying with BS 2081, except for closets used on board aircraft.

The main changes introduced in this revision are:

- 1) the biological efficacy of the preparations is specified in terms of performance rather than compositional requirements;
- 2) the attributes that cannot be specified objectively have been transferred to Appendix A.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
