Foreword

This British Standard has been prepared under the direction of the Fibres, Yarns and Fabrics Standards Committee.

This standard includes two procedures for extracting specimens with water, a hot water extraction and a cold water extraction.

This standard supersedes BS 3266:1969, which is now withdrawn.

Methods for pH can be found in BS EN 1413:1998 Textiles — Determination of pH of aqueous extract.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
