Cooperating organizations

The Electronic Components Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following:

- British Electrical and Allied Manufacturers' Association (BEAMA)
- Electronic Components Industry Federation*
- Electronic Engineering Association*
- Electricity Supply Industry in England and Wales
- Institution of Electronic and Radio Engineers
- Ministry of Defence*
- National Supervising Inspectorate*
- Post Office*
- Society of British Aerospace Companies Limited
- Telecommunications Engineering and Manufacturing Association (TEMA)*

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the Technical Committee entrusted with the preparation of this British Standard:

- British Broadcasting Corporation
- Engineering Equipment Users' Association

This British Standard, having been prepared under the direction of the Electronic Components Standards Committee, was published under the authority of the Executive Board and comes into effect on 30 January 1981

Contents

	Page
Cooperating organizations	Inside front cover
National foreword	ii
Chapter I. General	
6.5 Sundry quantities	1
Chapter II. Letter symbols for bipolar transistors	
3.4.2 Small-signal parameters	1
3.5 Frequency parameters	2
3.9 Matched-pair bipolar transistors	2
Chapter III. Letter symbols for low-power signal diodes	
3.1 Voltages	2
3.3 Powers	2
3.5 Sundry quantities	3
Chapter IV. Letter symbols for voltage reference and voltage regulator diodes	
3.3 Sundry quantities	3
Chapter VII. Letter symbols for rectifier diodes	
3.1 Voltages	3
3.2 Currents	3
3.3 Powers	3
Chapter VIII. Letter symbols for thyristors	
3.2 Principal currents	4
3.5 Time quantities	4
3.6 Sundry quantities	4
3.7 Powers	4
Chapter IX. Letter symbols for field-effect transistors	
3.7 Matched-pair field-effect transistors	5
Chapter X. Letter symbols for digital integrated microcircuits	
2.2.3 Other subscripts	5
3 Sundry functions	5
Chapter XI. Letter symbols for analogue integrated microcircuits	
1 Voltages and currents	5
4 Sundry quantities	6
Chapter XII. Letter symbols for mixer diodes	
3.2 Other parameters	6
Chapter XIII. Letter symbols for current-regulator diodes	
1 Voltages	6
2 Currents	6
3 Sundry quantities	6

National foreword

This second supplement to BS 3363:1980 has been prepared under the direction of the Electronic Components Standards Committee. It is identical with IEC Publication 148B “*Second supplement to Publication 148 (1969) Letter symbols for semiconductor devices and integrated microcircuits*” published in 1974 by the International Electrotechnical Commission (IEC). It adds new letter symbols to Chapter I, General, Chapter II, Bipolar transistors, Chapter III, Low-power signal diodes, Chapter IV, Voltage reference and voltage regulator diodes, Chapter VII, Rectifier diodes, Chapter VIII, Thyristors, Chapter IX, Field-effect transistors, Chapter X, Digital integrated microcircuits, Chapter XI, Analogue integrated microcircuits, Chapter XII, Mixer diodes and Chapter XIII, Current-regulator diodes.

Typographical conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some typographical conventions are not identical with those used in British Standards.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
