Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the General Eletrotechnical Engineering Standards Committee (GEL/-) to Technical Committee GEL/16, upon which the following bodies were represented:

- Adhesive Tape Manufacturers' Association
- British Industrial Ceramic Manufacturers' Association
- British Paper and Board Industry Federation (PIF)
- British Plastics Federation
- British Telecommunications plc
- Department of Trade and Industry (British Calibration Service)
- ERA Technology Ltd.
- Electrical and Electronic Insulation Association (BEAMA Ltd.)
- Electrical Installation Equipment Manufacturers' Association (BEAMA Ltd.)
- Electricity Supply Industry in England and Wales
- Electronic Engineering Association
- Ministry of Defence
- Rotating Electrical Machines Association (BEAMA Ltd.)
- Rubber and Plastics Research Association of Great Britain
- Telecommunication Engineering and Manufacturing Association (TEMA)
- Transmission and Distribution Association (BEAMA Ltd.)

The following body was also represented in the drafting of the standard:

Mica Trade Club

This British Standard, having been prepared under the direction of the General Electrotechnical Engineering Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 January 1986

© BSI 12-1999

First published November 1962
First revision January 1986

National foreword

This revision of BS 3564 has been prepared under the direction of the General Eletrotechnical Engineering Standards Committee and supersedes BS 3564:1962 which is withdrawn. It is identical with ISO 67:1981 “*Muscovite mica blocks, thins and films — Grading by size*” published by the International Organization for Standardization (ISO).

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “International Standard” appear, referring to this standard, they should be read as “British Standard”.

Where expressions such as “agreed between the interested parties” and “subject to agreement...” appear, e.g. in 3.12 and 5.3, this should be taken to indicate that the subject matter concerned is not inherently part of the requirements of the standard, but should be included in the purchase contract.

Cross-references

International Standard ^a	Corresponding British Standard
ISO 3:1973	BS 2045:1965 <i>Preferred numbers</i> (Technically equivalent)
ISO 2185:1972	BS 5804:1979 <i>Method of visual classification for muscovite mica blocks, thins and films</i> (Identical)

^a Undated in the text.

The Technical Committee has reviewed the provisions of ISO 444 to which reference is made in the text and has decided that they are acceptable for use in conjunction with this standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
