BRITISH STANDARDS INSTITUTION

Incorporated by Royal Charter

2 PARK STREET, LONDON W1A 2BS

Telex: 266933

Telephone: 01-629 9000

THIS BRITISH STANDARD, having been approved by the Iron and Steel Industry Standards Committee was published under the authority of the General Council on 23 February, 1971.

© British Standards Institution, 1971.

SBN: 580 06188 4

First published, May, 1963

First revision, February 1971.

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 5000, fully indexed and with a note of the contents of each, will be found in the British Standards Yearbook, price £1.50. The BS Yearbook may be consulted in many public libraries and similar institutions.

This Standard makes reference to the following British Standard:

BS 4545. Methods for mechanical testing of steel wire.

British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions.

The following BSI references relate to the work on this standard:
Committee reference ISE/9, ISE/9-/6.

SPECIFICATION

1. GENERAL REQUIREMENTS

1.1 Scope	5
1.2 Definitions	6
1.3 Information to be supplied by the purchaser	6
1.4 Manufacture of strand	6
1.5 Routine inspection and testing	7
1.6 Selection of test pieces and number of tests	8
1.7 Tensile test	8
1.8 Elongation	8
1.9 Proof load	9
1.10 Relaxation test	9
1.11 Retests	9
1.12 Packing and identification	10

2. NORMAL RELAXATION STRAND

2.1 Manufacture	12
2.2 Sizes of strand	12
2.3 Mechanical properties	12

3. LOW RELAXATION STRAND

3.1 Manufacture	14
3.2 Sizes of strand	14
3.3 Mechanical properties	14

APPENDICES

A. Special lengths of strand	16
B. Relation between metric and other values	16

TABLES

1. Chemical composition	6
2. Mechanical and physical properties of normal relaxation strand	13
3. Mechanical and physical properties of low relaxation strand	15
