Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the General Mechanical Engineering Standards Committee (GME/-) to Technical Committee GME/8, upon which the following bodies were represented:

- City of Birmingham Polytechnic
- Department of Trade and Industry (National Engineering Laboratory)
- Department of Trade and Industry (National Measurement Accreditation Service)
- Department of Trade and Industry (National Physical Laboratory)
- Gauge and Tool Makers' Association
- Institution of Production Engineers
- Ministry of Defence

This British Standard, having been prepared under the direction of the General Mechanical Engineering Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 December 1987

Foreword

This revision of BS 3731 has been prepared under the direction of the General Mechanical Engineering Standards Committee. It supersedes BS 3731:1977 which is withdrawn.

In this revision the requirements relating to matched pairs of blocks have been altered to take account of production difficulties, and the opportunity has been taken to make certain other requirements more specific.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
