Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Non-ferrous Metals Standards Policy Committee (NFM/-) to Technical Committee NFM/10, upon which the following bodies were represented:

- Association of Bronze and Brass Founders
- British Non-ferrous Metals Federation
- British Stainless Steel Association
- British Steel Industry
- Institute of British Foundrymen
- London Metal Exchange
- Nickel Development Institute
- Non-ferrous Metal Stockists
- Steel Casting Research and Trade Association
- Co-opted Members

This British Standard, having been prepared under the direction of the Non-ferrous Metals Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 November 1993

© BSI 08-1999

First published April 1930
Second edition June 1977
Third edition November 1993

Foreword

This revision of BS 375 has been prepared under the direction of the Non-ferrous Metals Standards Policy Committee. It is the second revision of BS 375 which was originally published in 1930 and subsequently revised in 1977. It supersedes BS 375:1977, which is withdrawn.

In this revision the grades R.99.95A and R.99.95B, included in the previous edition, have been merged into one grade, designated R 99.95. The composition requirements for the R 99.95, R 99.9, and R 99.8 grades have been changed from those in the previous edition, where appropriate, to align with current technology.

These composition changes have been made to align as closely as possible with the latest proposals in ISO/TC155 for the revision of ISO 6283:1979.

No changes have been made to the composition requirements for the R 99.5 grade. Changes have also been introduced in the clauses dealing with sampling, analysis methods, inspection documentation and marking, to reflect current practice.

WARNING. This British Standard specifies a substance that may be injurious to health if adequate precautions are not taken. The standard refers only to technical suitability and does not absolve the user from legal obligations relating to health and safety at any stage.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
