Foreword

It is recommended that this Part of this standard be read in conjunction with the general information in the Introduction to BS 3900 issued separately.

NOTE Part E3 was published in 1966 and was based on DEF-1053 Method No. 17(a) “Resistance to impact (falling weight)”. This revision fully metricates the method, and the diagrams have been simplified.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 4 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments
6907	February 1992	Indicated by a sideline in the margin
