

Methods of test for paints

Part H5: Designation of degree of flaking —

[ISO title: Paints and varnishes — Evaluation of degradation of paint coatings — Designation of intensity, quantity and size of common types of defect — Part 5: Designation of degree of flaking]

It is recommended that this Part be read in conjunction with the general information given in the Introduction to BS 3900, issued separately.

UDC 667.613.72:620.191.355

National foreword

This Part of BS 3900 has been prepared under the direction of the Pigments, Paints and Varnishes Standards Committee. It is identical with ISO 4628/5:1982 “*Paints and varnishes — Evaluation of degradation of paint coatings — Designation of intensity, quantity and size of common types of defect — Part 5: Designation of degree of flaking*”, published by the International Organization for Standardization (ISO).

Terminology and conventions. The text of the international standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following. The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker. Wherever the words “International Standard” appear, referring to this standard, they should be read as “British Standard” and wherever the words “this part of ISO 4628” and “ISO 4628/5” appear they should be read as “this Part of BS 3900” and “BS 3900-H5” respectively.
