

Derivation and verification of elevated temperature properties for steel products for pressure purposes —

Part 2: Method for deriving the elevated temperature yield or proof stress properties when data are limited

[ISO title: Steel products for pressure purposes — Derivation and verification of elevated temperature properties — Part 3: An alternative procedure for deriving the elevated temperature yield or proof stress properties when data are limited]

UDC 669.14-46:[620.172.251.22:620.172.244]

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Iron and Steel Standards Committee (ISM/-) to Technical Committee ISM/73 upon which the following bodies were represented:

- Associated Offices Technical Committee
- British Electrical and Allied Manufacturers' Association Ltd. (BEAMA)
- British Compressed Air Society
- British Gas Corporation
- British Shipbuilders
- British Steel Industry
- British Valve Manufacturers' Association Ltd.
- Electricity Supply Industry in England and Wales
- Engineering Equipment and Materials Users Association
- High Pressure Pipework Consultative Committee
- Lloyds Register of Shipping
- Process Plant Association
- Seamless Steel Tube Association
- Water-tube Boilermakers' Association
- Welding Institute
- Coopted members

The following bodies were also represented in the drafting of the standard, through subcommittees and panels:

- Department of Trade and Industry (Minerals and Metals Division)
- Department of Trade and Industry (National Physical Laboratory)
- South of Scotland Electricity Board
- Steel Casting Research and Trade Association
- United Kingdom Atomic Energy Authority

This British Standard, having been prepared under the direction of the Iron and Steel Standards Committee, was published under the authority of the Board of BSI and comes into effect on 28 November 1986
