Foreword

This British Standard was first published in 1968 under the authority of the Aerospace Industry Standards Committee at the request of the Society of British Aerospace Companies Limited. This revision takes into account accumulated experience since it was first published. The provision for identification by a standard colour code has been deleted but colour coding may continue to be used by arrangement between the user and the supplier.

Items packaged to the requirements of this standard will also meet the packing requirements of ISO 1749:1973 “*Aircraft — Elastomeric sealing rings — Packaging and identification*”. The identification requirements of ISO 1749, however, differ from those specified in this standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, page 1 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the British Aerospace Standards Committee, was published under the authority of the Executive Board on 31 January 1979
