Foreword

This Part of this British Standard is an introduction to a composite standard (BS 3G 100) in the Aerospace Series which is being progressively prepared to specify general requirements for equipment in aircraft. BS 3G 100 is a revision of BS 2G 100 to make it applicable to all types of aircraft equipment. Appendix A provides a check list to assist readers in maintaining BS 3G 100 in an up-to-date condition and to record subsequent changes as they occur. This Part of this British Standard supersedes BS 3G 100-0:1972, which is therefore withdrawn. A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Aerospace Standards Committee, was published under the authority of the Executive Board and comes into effect on 30 September 1980
