Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee ACE/6, Aerospace avionic, electrical and fibre-optic technology, upon which the following bodies were represented:

- British Airways
- British Cable Makers Confederation
- British Rubber Manufacturers' Association
- Civil Aviation Authority (Airworthiness Division)
- Federation of the Electronics Industry
- Ministry of Defence
- Society of British Aerospace Companies

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 January 1997

Foreword

This British Standard has been prepared by Technical Committee ACE/6.

It is based on ISO 2635 : 1979, published by the International Organization for Standardization (ISO), and constitutes a revision of BS 2G 231 : 1990, which is superseded and withdrawn.

BS G 222 : 1976 was published before international agreement on ISO 2635 was achieved, and therefore differs slightly in its conductor requirements.

Future aerospace cable specifications will be cross-referred to BS G 231 for their conductor requirements.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
