

Specification for

Mosaic parquet panels —

Part 1: General characteristics

[ISO title: Mosaic parquet panels — General characteristics]

UDC 69.025.351.3:674.213

Cooperating organizations

The Timber Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following Government departments and scientific, professional and industrial organizations:

- British Plastics Federation
- British Woodwork Manufacturers' Association*
- Department of the Environment — Building Research Establishment, Princes Risborough Laboratory
- Department of the Environment — Housing and Construction
- Fibre Building Board Development Organization Ltd.
- Forestry Commission
- Hardwood Flooring Manufacturers' Association*
- Institute of Wood Science
- Institution of Civil Engineers
- Institution of Structural Engineers
- Joinery and Timber Construction Association
- National Sawmilling Association
- Royal Institute of British Architects
- Royal Institution of Chartered Surveyors
- Softwood Agents' and Brokers' Association
- Timber Packaging and Pallet Confederation
- Timber Research Development Association*
- Timber Trade Federation*

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

- Contract Flooring Association
- Incorporated Association of Architects and Surveyors

This British Standard, having been prepared under the direction of the Timber Standards Committee, was published under the authority of the Executive Board on 31 October 1977

Foreword

This Part of this British Standard, prepared under the direction of the Timber Standards Committee, is identical with ISO 631:1975 “*Mosaic parquet panels — General characteristics*”. ISO 631 replaces draft ISO/R 756 but does not cover quality requirements and limits of defects; these are to be dealt with in a separate International Standard covering oak panels.

BS 4050:1966 “*Wood mosaic flooring*”, which was based on draft ISO/R 756, has been redesignated Part 2 “*Classification and quality requirements*” of BS 4050, and has been amended accordingly.

Terminology and conventions. The text of the International Standard has been accepted as suitable for publication, without deviation, as a British Standard. Certain terminology and conventions are used, however, that are not identical with those used in British Standards. Attention is therefore drawn to the following.

Where the words “International Standard”, relating to this publication, appear, they should be interpreted as “British Standard”.

The comma has been used throughout as a decimal marker. In British Standards it is current practice to use a full point (a full stop on the baseline) as the decimal marker.

Cross reference. Since the publication of ISO 631 in 1975, ISO/R 2036 has been approved, with a modified title, as ISO 2036. There is no equivalent British Standard, although BS 881 & BS 589 “*Nomenclature of commercial timbers including sources of supply*” lists the botanical species and standard names. For the convenience of users, a table of the symbols for the wood species from ISO 2036 and the botanical species and standard names from BS 881 & BS 589 is given in the National appendix A. Insofar as compliance with the requirements of ISO 2036 is specified in the body of this dual-numbered standard, the National appendix A is to be regarded as mandatory for the purposes of this standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 7 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
