Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee MTE/18, Tools, tips and inserts for cutting applications, upon which the following bodies were represented:

- British Engineers Cutting Tools Association
- British Hardmetal Association
- Co-opted members

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 February 1997

© BSI 12-1998

First published August 1984
Second edition February 1997

National foreword

This British Standard has been prepared by Technical Committee MTE/18 and is identical with ISO 6261:1995 *Boring bars (tool holders with cylindrical shank) for indexable inserts — Designation* published by the International Organization for Standardization (ISO). It supersedes BS 4193-14:1984 which is withdrawn.

Cross-reference. The Technical Committee has reviewed the provisions of ISO 5609:1995 to which normative reference is made in the text, and has decided that they are acceptable for use in conjunction with this standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
