

Determination of the tensile properties of paper and board —

Part 1: Constant rate of loading method

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Paper and Printing Standards Policy Committee (PAM/-) to Technical Committee PAM/11, upon which the following bodies were represented:

- British Fibreboard Packaging Association
- British Paper and Board Industry Federation (PIF)
- British Printing Industries Federation
- British Telecommunications plc
- Envelope Makers' and Manufacturing Stationers' Association
- Her Majesty's Stationery Office
- Man-made Fibres Producers' Committee
- Ministry of Defence
- Paper Sack Development Association Ltd.
- Pira INTERNATIONAL
- Post Office
- Society of British Printing Ink Manufacturers
- University of Manchester Institute of Science and Technology

This British Standard, having been prepared under the direction of the Paper and Printing Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 December 1992

National foreword

This Part of BS 4415 has been prepared under the direction of the Paper and Printing Standards Policy Committee. It is identical with ISO 1924-1:1992 *Paper and board — Determination of tensile properties — Part 1: Constant rate of loading method* published by the International Organization for Standardization (ISO).

It supersedes BS 4415-1:1985 which is withdrawn.
