

Factory-made chimneys —

Part 3: Specification for chimneys with stainless steel fluelining for use with oil fired appliances

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Building Services Standards Policy Committee (SEB/-) to Technical Committee SEB/30, upon which the following bodies were represented:

- Association of British Solid Fuel Appliances Manufacturers
- British Coal Corporation
- British Flue and Chimney Manufacturers' Association
- British Gas plc
- British Steel Industry
- DSFAAS Ltd.
- Department of the Environment (Building Research Establishment)
- Department of the Environment (Construction Industries Directorate)
- Institute of Domestic Heating and Environmental Engineers
- Institute of Wastes Management
- National Association of Plumbing, Heating and Mechanical Services Contractors
- Royal Institute of British Architects
- Scottish Development Department

This British Standard, having been prepared under the direction of the Building Services Standards Policy Committee, was published under the authority of the Board of BSI and comes into effect on 31 December 1990

Foreword

This Part of BS 4543 has been prepared under the direction of the Building Services Standards Policy Committee, and deals with factory-made chimneys intended for dry construction and for application within a dwelling, with a terminal assembly designed for exposure to the external environment.

This Part of BS 4543 specifies requirements for factory-made chimneys with stainless steel internal and metal external surfaces, and intended for use with oil fired appliances. It should be read in conjunction with BS 4543-1 and it supersedes BS 4543-3:1976 which is withdrawn. Part 2 of this standard specifies requirements for chimneys intended for use with appliances burning solid fuel.

It is accepted that not every combination of accessories in any one manufacturer's range is tested in accordance with the requirements of this standard. However, the ability of the representative chimney tested to meet the requirements specified is taken as evidence that all such accessories are fit for purpose when used in accordance with the manufacturer's recommendations.

Durability testing does not form part of this standard.

Factory-made chimneys with non-metallic linings are not covered by this revision and will be considered at a later date.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
