

Methods for

Preparation of calibration gas mixtures —

**Part 9: Comparison methods and
methods for establishing traceability —**

**Section 9.1 Determination of
composition by comparison methods**

[ISO title: Gas analysis — Determination of composition of
calibration gas mixtures — comparison methods]

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Environment and Pollution Standards Committee (EPC/-) to Technical Committee EPC/46 upon which the following bodies were represented:

- British Ceramic Research Association
- British Coal
- British Gas plc
- Cement Makers' Federation
- Chemical Industries Association
- Department of Energy (Gas and Oil Measurement Branch)
- Department of Trade and Industry (Laboratory of the Government Chemist)
- Department of Trade and Industry (Warren Spring Laboratory)
- Department of Trade and Industry (Electronics Applications Division)
- Electricity Supply Industry in England and Wales
- GAMBICA (BEAMA Ltd.)
- Institute of Petroleum
- Institution of Gas Engineers
- Society of Chemical Industry
- Society of Glass Technology
- Society of Motor Manufacturers and Traders Limited
- Water Tube Boilermakers' Association

The following bodies were also represented in the drafting of the standard through subcommittees and panels:

- British Compressed Gases Association
- Department of Trade and Industry (National Physical Laboratory)
- Sira Limited

This British Standard, having been prepared under the direction of the Environment and Pollution Standards Committee, was published under the authority of the Board of BSI and comes into effect on 29 February 1988
